2. Reason for the revision

While net sales remains unchanged from the previous forecast, operating profit is revised upwards, primarily driven by positive performance of the PC business in the second quarter of current fiscal year. In addition, ordinary profit and profit attributable to owners of parent are also lifted, considering the impact of shares of profit of entities accounted for using equity method and other factors.

Note: The aforementioned forecasts of financial results are based on information available and deemed reasonable to the Sharp Group at the time of announcement and are not commitments made by the Company. Actual operating results may differ materially from the forecast due to various factors. The factors that may influence the figures for final reported business results include, but are not limited to:

- The economic situation in which the Company and its group companies operates;
- Sudden, rapid fluctuations in demand for the Company's products and services, as well as intense price competition;
- Changes in exchange rates (particularly between the Japanese yen and the U.S. dollar, the euro and other currencies);
- Regulations such as trade restrictions in other countries;
- The progress of collaborations and alliances with other companies;
- Litigation and other legal proceedings against the Company;
- Rapid technological changes in products and services.
