Greenhouse Gas Emissions (thousand tons CO ₂)	1,114	1,016	940	1,077	974

- (Notes) 1. Sharp has applied ASBJ Statement No. 28 Partial Amendments to Accounting Standard for Tax Effect Accounting (February 16, 2018) from the year ended March 31, 2019. The figures for the year ended March 31, 2018 have been reclassified by applying the accounting standard.
2. The amount of leased properties is included in capital investment.
3. Income (loss) per share is calculated by dividing profit (loss) attributable to owners of parent by the weighted average number of shares outstanding during the relevant period. For the years ended March 31, 2017, 2018, 2019 and 2020, since the dividend priority of the Class C shares is equal to that of the common shares, the number of Class C shares, after considering the conversion rate to common shares, is included in the number of shares outstanding for purposes of calculating the weighted average number of shares during the relevant period.
4. Number of outstanding shares (common shares) is shown by deducting the treasury shares.
5. Sharp carried out a share consolidation of common shares as well as Class C shares at a ratio of 10 shares to 1 share on October 1, 2017. The figures for the income (loss) per share and net assets per share are calculated on the assumption that Sharp conducted this consolidation at the beginning of the year ended March 31, 2017.
6. Of the 200,000 Class A shares issued, Sharp acquired and canceled 92,000 shares on January 30, 2019 and 108,000 shares on June 21, 2019. The effects of the said acquisition and cancellation of treasury stock are taken into consideration in the income per share for the years ended March 31, 2019 and 2020.
7. Ratio of disabled employees includes data for Sharp, one special subsidiary, and seven group companies as of June 1 for each fiscal year.
