Sharp Corporation and Consolidated Subsidiaries

## Net Sales

Consolidated net sales for the fiscal year ended March 31, 2021 amounted to ¥2,425,910 million, up ¥163,625 million (7.2%) year on year.

## Net Sales

(billions of yen)  
3,000

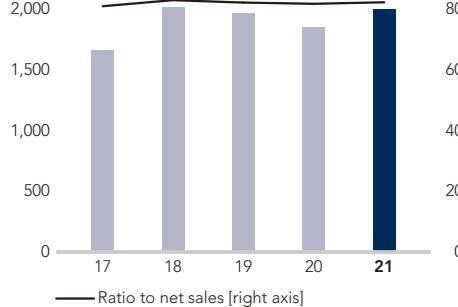

## Financial Results

Cost of sales increased ¥147,586 million to ¥2,004,593 million, while our cost of sales ratio increased from 82.1% to 82.6% year on year.

## Cost of Sales

(billions of yen)  
3,000

Selling, general and administrative (SG&A) expenses decreased ¥15,608 million to ¥338,204 million. The ratio of SG&A expenses against net sales decreased from 15.6% to 13.9% year on year. SG&A expenses included salaries and allowances of ¥107,644 million, retirement benefit expenses of ¥8,802 million, transportation and storage costs of ¥41,116 million, outsourcing expenses of ¥36,821 million, and research and development expenses of ¥20,968 million.

As a result, operating profit amounted to ¥83,112 million, an increase of ¥31,647 million (61.5%) year on year.

Non-operating income increased ¥945 million to ¥22,590 million, while non-operating

expenses increased ¥19,593 million to ¥42,527 million due to an increase in share of loss of entities accounted for using the equity method.

Extraordinary income increased ¥6,101 million to ¥12,357 million. Extraordinary losses decreased ¥15,009 million to ¥9,090 million. This was mainly due to a decrease in loss on valuation of investment securities.

As a result, profit before income taxes totaled ¥66,442 million, an increase of ¥34,110 million, up 2.1 fold year on year.

Profit attributable to owners of parent increased ¥39,536 million year on year to ¥53,263 million (3.9 fold). Income per share of common stock was ¥87.20.

Due to effects from the COVID-19, net sales decreased by approximately ¥107.8 billion, while operating profit decreased by approximately ¥32.0 billion.

## Segment Information

### [Smart Life]

Sales of Plasmacluster products in Japan rose significantly, while sales of washing machines, cooking appliances, etc., also rose. Furthermore, sales in the device businesses and other areas increased, and sales increased 3.4% to ¥879,910 million. Segment income rose 79.7% to ¥71,559 million, mainly due to increased sales, cost reductions, and a shift to high-value-add in white goods.

### [8K Ecosystem]

Although sales decreased for multi-function printers and panels used in automotive applications, which were significantly affected by COVID-19, sales increased for panels used in PCs and tablets, large-size panels, and finished TVs, resulting in sales of ¥1,282,938 million, up 11.2% year on year. Segment income rose 31.5% to ¥17,387 million, mainly due to overall increase in segment sales and progress in cost reductions, despite impact from declining sales of multi-function printers and panels used in automotive applications.

### [ICT]

Sales increased in the mobile communications and personal computers businesses, resulting in sales of ¥358,923 million, up 0.4% year on year. Segment income fell 25.0% to ¥15,421 million, mainly due to an increase in the ratio of mid-range models in the mobile communications business.

## Capital Investment and Depreciation

Capital investment totaled ¥91,572 million, up 51.2% year on year mainly due to acquisition of the Hakusan Plant and introducing production equipment for camera modules.

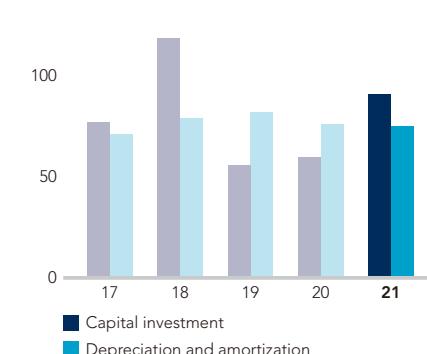

By business segment, capital investment was ¥21,984 million for Smart Life, ¥66,966 million for 8K Ecosystem and ¥817 million for ICT. Unallocated capital investment amounted to ¥1,804 million.

Depreciation and amortization declined by 1.4% to ¥75,597 million.

## Assets, Liabilities and Net Assets

Total assets at fiscal year-end amounted to ¥1,927,226 million, up ¥115,319 million from the previous fiscal year. This included the new consolidation of Sharp NEC Display Solutions, Ltd., and an increase in assets due to the acquisition of the Hakusan Plant.

## Assets

Current assets amounted to ¥1,188,770 million, up ¥107,621 million from the end of the previous fiscal year. This result was mainly due to an increase in cash and deposits of ¥116,867 million and an increase in notes and accounts receivable-trade of ¥34,030 million, which was offset in part by a decrease in inventories of ¥29,773 million. Inventories were ¥263,066 million. Within total inventories, finished products decreased ¥23,574 million to ¥133,330 million, works in process increased ¥536 million to ¥67,912 million, and raw materials and supplies decreased ¥6,735 million to ¥61,823 million.

Property, plant and equipment increased ¥37,538 million from the end of the previous fiscal year to ¥438,486 million.

Investments and other assets amounted to ¥254,855 million, down ¥29,663 million from the end of the previous fiscal year. This was mainly due to a decrease in investment securities.

# Financial Review

## Liabilities

Current liabilities increased ¥20,998 million from the end of the previous fiscal year to ¥885,582 million.

Short-term borrowings decreased by ¥74,698 million despite an increase of ¥49,825 million from the end of the previous fiscal year in notes and accounts payable-trade and an increase of ¥7,835 million in accrued expenses.

Non-current liabilities increased ¥1,139 million from the end of the previous fiscal year to ¥677,505 million. This result was mainly due to an increase of ¥23,148 million in long-term borrowings, which was offset in part by a decrease of ¥19,658 million in retirement benefit liability.

Interest-bearing debt at fiscal year-end stood at ¥740,818 million, down ¥52,387 million from the end of the previous fiscal year.

## Interest-Bearing Debt

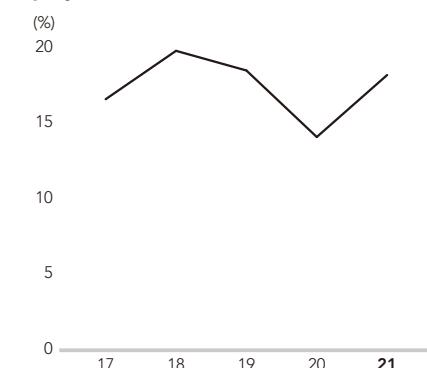

## Net Assets

Net assets amounted to ¥364,139 million, up ¥93,180 million compared to the previous fiscal year-end balance of ¥270,959 million.

This result was due to an increase in capital surplus due to the recording of profit attributable to owners of parent, despite payment of dividends.

Our equity ratio was 18.2%.

## Equity Ratio

## Cash Flows

Cash and cash equivalents were ¥292,792 million, up ¥122,469 million from the end of the previous fiscal year due to the capital inflows from operating activities exceeding the combined capital outflows from financing activities and investing activities.

Cash provided by operating activities amounted to ¥204,642 million, up ¥136,189 million compared to cash provided in the amount of ¥68,453 million in the previous fiscal year.

This result mainly consisted of an increase of ¥34,110 million in profit before income taxes, an increase of ¥35,414 million in accounts receivable-other, an increase of ¥109,777 million in inventories, and an increase of ¥62,835 million in trade payables, despite a decrease of ¥110,547 million in trade receivables compared to the previous fiscal year.

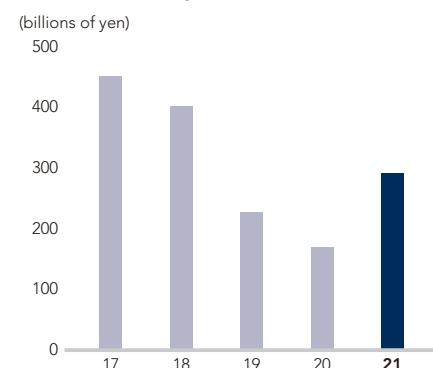

Cash used in investing activities totaled ¥14,114 million, down ¥114,135 million compared to cash used of ¥128,249 million in the previous fiscal year.

The result was mainly due to decreases of ¥37,787 million in expenditure on purchase of property, plant and equipment, ¥27,838 million in expenditure on purchase of investment securities, and ¥11,497 million in expenditure in payments into time deposits, in addition to increases in ¥4,716 million in proceeds from sale of property, plant and equipment and ¥12,826 million in proceeds from withdrawal of time deposits.

Cash used in financing activities was ¥76,724 million, up ¥81,285 million compared to cash provided of ¥4,560 million in the previous fiscal year.

This is due to a net decrease in short-term borrowings of ¥89,398 million and a proceeds from long-term borrowings of ¥40,251 million, in contrast to outflows for redemption of bonds of ¥30,000 million, outflows for purchases of treasury shares of ¥97,078 million, a net increase in short-term borrowings of ¥157,355 million, and a proceeds from long-term borrowings of ¥1,790 million in the previous fiscal year.

## Cash and Cash Equivalents

Notes: 1. Sales figures by segment shown in Segment Information include internal sales and transfers among segments (Smart Life, 8K Ecosystem, ICT). Segment income figures are amounts before adjustment for inter-segment trading.

2. Effective from the consolidated fiscal year ending March 31, 2022, the Company has amended its segment classification.

Please refer to "19. Significant Subsequent Events (a) Change of segment", P.58, for information on sales, income, and loss by segment for the consolidated fiscal year ended March 31, 2021 based on the new segmentation.

3. Capital investment figures shown in Capital Investment and Depreciation include the amount of leased properties.

# Notes to Consolidated Financial Statements

Sharp Corporation and Consolidated Subsidiaries

## 1. Summary of Significant Accounting and Reporting Policies

### (a) Basis of presenting consolidated financial statements

The accompanying consolidated financial statements of Sharp Corporation ("the Company") have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in conformity with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards ("IFRS").

The financial statements of the Company's overseas consolidated subsidiaries for consolidation purposes have been prepared in conformity with IFRS or generally accepted accounting principles in the United States of America ("US GAAP"), with adjustments for the specified five items where applicable according to Practical Issues Task Force No. 18 "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for Consolidated Financial Statements".

The accompanying consolidated financial statements have been translated into English (with no reclassifications) from the consolidated financial statements of the Company prepared in accordance with Japanese GAAP and filed with the appropriate Local Finance Bureau of the Ministry of Finance as required by the Japanese Financial Instruments and Exchange Act.

In preparing the accompanying consolidated financial statements and notes, Japanese yen figures less than one million yen have been rounded down to the nearest million yen. Therefore, total or subtotal amounts shown in the accompanying consolidated financial statements and notes thereto are not necessarily equal to the sum of individually presented amounts.

### (b) Principles of consolidation

The accompanying consolidated financial statements include the accounts of the Company and 120 companies over which the Company has power of control through the holding of majority voting rights or with the existence of other certain conditions. Investments in 1 nonconsolidated subsidiary and 19 affiliates on which the Company has significant influence regarding their operating and financial policies are accounted for using the equity method.

Changes in the consolidated subsidiaries for the fiscal year ended March 31, 2021 were as follows:

(Included in scope)

Sharp Display Technology Corporation

Sharp NEC Display Solutions, Ltd.

And 16 others

(Excluded from scope)

Sharp Brasil Comércio e Distribuição de Artigos Eletrônicos Ltda.

Sharp Center Arhus ApS

And 1 other

Change in the nonconsolidated subsidiaries and affiliates accounted for using the equity method for the fiscal year ended March 31, 2021 was as follows:

(Excluded from scope)

Sharp Life Science International Ltd.

Sharp India Ltd. is the main nonconsolidated subsidiary.

Sharp Tokusen Industry Co., Ltd. is the main nonconsolidated subsidiary not accounted for using the equity method.

### (c) Investment securities

Investment securities consist principally of marketable and non-marketable equity securities.

Investment securities with available fair market values are stated at fair market value, which is calculated as the average of market prices during the last month of the fiscal year.

Investment securities with no available fair market values are stated at gross average cost.

With respect to the investments in partnerships, the amount determined by applying the holding ratio to the profits or losses resulting from the operations of the partnerships is stated as non-operating income or expenses, and added to or deducted from the balance of investment securities.

### (d) Derivatives

Derivatives are stated at fair value.

### (e) Inventories

Inventories held by the Company and its domestic consolidated subsidiaries are primarily measured at moving average cost. For balance sheet valuation, in the event that profitability of inventories decrease, inventories are written down to net realizable value. For overseas consolidated subsidiaries, inventories are measured at the lower of moving average cost and net realizable value.

### (f) Depreciation and amortization

For the Company and its domestic consolidated subsidiaries, depreciation of property, plant and equipment other than leased assets and right-of-use assets is computed using the declining-balance method.

Meanwhile, machinery and equipment at the LCD plants in Mie and Kameyama and a part of the Sakai Plant are depreciated using the straight-line method.

Buildings (excluding facilities attached to buildings) acquired on or after April 1, 1998, and facilities attached to buildings and structures acquired on or after April 1, 2016 are depreciated using the straight-line method.

Property, plant and equipment at overseas consolidated subsidiaries are depreciated using the straight-line method.

Amortization of intangible assets other than leased assets is computed using the straight-line method.

# Notes to Consolidated Financial Statements

Software used by the Company is amortized using the straight-line method over the estimated useful life of principally 5 years, and software embedded in products is amortized over the forecasted sales quantity.

Depreciation of leased assets under non-ownership-transfer finance lease transactions is computed using the straight-line method, using the lease period as the useful life and the residual value as zero.

Right-of-use assets are depreciated using the straight-line method over the lesser of the useful life of the asset or the term of the lease.

## (g) Allowance for doubtful accounts

The estimated amounts of allowance for general receivables are primarily determined based on the past loss experience. For particular receivables, including those from debtors at risk of bankruptcy, the allowance is recorded to prepare for potential losses in individually estimated unrecoverable amounts. This procedure is made to reflect the impact of the risk of possible credit loss.

## (h) Provision for bonuses

The Company and its consolidated subsidiaries accrue estimated amounts of employees' bonuses based on the estimated amounts to be paid in the subsequent period which relate to their performance in the current period.

## (i) Provision for product warranties

Estimated amounts of warranty are accrued based on the past experience. This procedure is made to reflect the impact of the risk of expenses being incurred for after-sales service within the warranty period in respect of sales recorded prior to the balance sheet date.

## (j) Provision for sales promotion expenses

The reserve for payment of sales promotion expenses is set aside based on estimated amounts to be paid to agencies and dealers in the subsequent period in respect of services rendered or goods received prior to the balance sheet date.

## (k) Provision for restructuring

The estimated amounts of restructuring are recognized as a provision in order to prepare for future expenses related to structural reform.

## (l) Valuation reserve for inventory purchase commitments

Regarding long-term purchase agreements of raw materials where the market price of the raw material is significantly lower than the purchase price set forth in the agreement, the difference between the purchase price in the agreement and the latest market price or the resale price, whichever is lower, is recorded as an estimated loss associated with the agreement.

This is to prepare for potential losses that could be generated from future production and sales activities as the Company executes the agreement in the future.

## (m) Defined benefit pension plan

The estimated amount of defined benefit pension plans to be paid at future retirement dates is allocated to each service year based on the plan's benefit formula.

Past service costs are amortized primarily using the straight-line method over the average remaining service period of employees (10 years) commencing from the current period. Actuarial gains and losses are primarily amortized using the straight-line method over the average service period of employees (10 years) commencing from the period following that in which the gain or loss was incurred.

## (n) Hedge accounting

The Company and some of its consolidated subsidiaries use derivative financial instruments, including foreign exchange forward contracts in order to hedge the risk exposure arising from fluctuations in foreign currency exchange rates associated with assets and liabilities denominated in foreign currencies. Furthermore, the Company uses interest rate swaps in order to hedge the interest rate fluctuation risks associated with some borrowings with variable interest rates from financial institutions.

All derivative financial instruments are stated at fair value and recorded on the balance sheets. The deferred method is used for recognizing gains and losses on hedging instruments and the hedged items. When foreign exchange forward contracts meet certain conditions, the hedged items are stated at the forward exchange contract rates.

For borrowings from financial institutions, interest rate swaps are used to hedge the risks of interest rate fluctuations.

Derivative financial instruments are used based on internal policies and procedures related to risk management. The risks of fluctuations in foreign currency exchange rates and variable interest rates have been assumed to be completely hedged over the period of hedging contracts as the major conditions of the hedging instruments and the hedged items are consistent. Accordingly, an evaluation of the effectiveness of the hedging contracts is not required.

## (o) Method and period for amortization of goodwill

Goodwill is amortized using the straight-line method over the estimated effective term. Goodwill recorded in the consolidated subsidiaries in the U.S.A. is amortized straight line over 10 years.

However, if the amount of goodwill is insignificant, the entire amount is amortized during the period in which the goodwill arises.

## (p) Cash and cash equivalents in the consolidated statements of cash flows

Cash and cash equivalents in the consolidated statements of cash flows comprise cash on hand, demand

# Notes to Consolidated Financial Statements

deposits in banks, and highly liquid short-term investments with original maturities of three months or less for which the risks of fluctuations in value are not considered to be significant.

## (q) Consumption taxes

The tax exclusion method is applied.

## (r) Application of tax effect accounting for transition from consolidated taxation system to group tax relief system

Although there were some changes for the transition to the group tax relief system established in the "Act for Partial Amendment of the Income Tax Act, etc." (Act No. 8 of 2020) and the coordinated revisions in the taxation system for individual companies, the Company and a part of its domestic consolidated subsidiaries continued to present the amounts of deferred tax assets and deferred tax liabilities according to the previous tax acts, as provided for in Paragraph 3, "Practical Solution on the Treatment of Tax Effect Accounting for the Transition from the Consolidated Taxation System to Group Tax Sharing System" (Practical Issues Task Force No. 39, March 31, 2020), instead of applying the provisions in Paragraph 44 of the "Implementation Guidance on Tax Effect Accounting" (ASBJ Statement No. 28, February 16, 2018).

## (s) Significant accounting estimates

### (1) Valuation of inventories

i) Amount recorded in the consolidated financial statements of the fiscal year ended March 31, 2021

Yen (millions)	
Fiscal year ended March 31, 2021	
Inventories	¥ 263,066

ii) Information related to the contents of significant accounting estimates for identified items

The Group reduces the book value of inventories when their net realizable value falls below the book value. In addition, some inventories deemed slow-moving for more than a certain period of time are devalued regularly as time goes by, assuming their salability is declining. Moreover, the book value of some inventories is also devalued individually when they are deemed difficult to sell.

However, if a disadvantageous situation arises for the Group in the future, such as a price decline resulting from unpredictable changes in the environment, it may be necessary to additionally reduce the book value in the consolidated financial statements from the next fiscal year onward.

### (2) Impairment loss on non-current assets

i) Amount recorded in the consolidated financial statements of the fiscal year ended March 31, 2021

Yen (millions)	
Fiscal year ended March 31, 2021	
Property, plant and equipment	¥ 438,486
Intangible assets	¥ 45,114

ii) Information related to the contents of significant accounting estimates for identified items

When there is an indication of impairment such as continued operating loss or negative cash flow from operating activities, the Company determines whether or not an asset or asset group is impaired. If it is determined that the value in use or net realizable value of the asset (group), whichever is higher, has fallen below its book value, the difference is recognized as an impairment loss. The future business plan, which forms the basis for calculating the value in use, is created in consideration of information available at the time of financial closing, such as market prices and demand outlook provided by external information research companies. Additionally, the net realizable value is determined by a rational method such as asset valuation by a third party.

In the future, however, if there are changes in the market environment, which is the premise of the Company's business plan, there is a possibility that an additional impairment loss may be recorded in the consolidated financial statements for the next fiscal year and thereafter.

## (t) Unapplied accounting standards and interpretations

The accounting standards and interpretations issued as of March 31, 2021 but not yet applied as of the fiscal year ended March 31, 2021 were as follows:

The monetary impact amounts arising through the application of these standards and interpretations are under evaluation.

### The Company and domestic consolidated subsidiaries

Name of the standards and interpretations	Description of the standards and interpretations	Planned adoption period

# Notes to Consolidated Financial Statements

## (u) Changes in presentation method

(Consolidated statements of operations)

"Rental expenses on non-current assets" (¥2,360 million for the fiscal year ended March 31, 2021), which was separately presented in the fiscal year ended March 31, 2020, has been included in "Other" under "Non-operating expenses" for the fiscal year ended March 31, 2021, since its amount does not exceed 10/100 of the total non-operating expenses. The consolidated financial statements for the fiscal year ended March 31, 2020 have been reclassified to reflect this change in presentation method.

As a result, in the consolidated statements of operations for the fiscal year ended March 31, 2020, "Other" under "Non-operating expenses," which was ¥11,632 million, now includes "Rental expenses on non-current assets" of ¥2,517 million, totaling ¥14,150 million.

(Consolidated statements of cash flows)

(1) "Increase (decrease) in advances received" and "Increase (decrease) in valuation reserve for inventory purchase commitments", which were included in "Other, net" under "Cash flows from operating activities" in the fiscal year ended March 31, 2020, are separately presented since their materiality has increased. In order to reflect this change in presentation method, the consolidated financial statements for the fiscal year ended March 31, 2020 have been reclassified.

As a result, ¥9,683 million of "Other, net" under "Cash flows from operating activities" in the consolidated statements of cash flows for the fiscal year ended March 31, 2020 have been reclassified as ¥11,433 million of "Increase (Decrease) in advances received", ¥9 million of "Increase (decrease) in valuation reserve for inventory purchase commitments", and ¥(1,760) million of "Other, net".

(2) "Proceeds from share issuance to non-controlling shareholders", which was separately presented in the fiscal year ended March 31, 2020, is included in "Other, net" under "Cash flows from financing activities" since its materiality has diminished. In order to reflect this change in presentation method, the consolidated financial statements for the fiscal year ended March 31, 2020 have been reclassified.

As a result, ¥17 million of "Proceeds from share issuance to non-controlling shareholders" under "Cash flows from financing activities" and ¥(8,127) million of "Other, net" in the consolidated statements of cash flows for the fiscal year ended March 31, 2020 have been reclassified as ¥(8,110) million of "Other, net".

(Application of "Accounting Standard for Disclosure of Accounting Estimates")

The Company has adopted the "Accounting Standard for Disclosure of Accounting Estimates" (ASBJ Statement No. 31, March 31, 2020) from the consolidated financial statements at the end of the fiscal year ended March 31, 2021 and provides notes on significant accounting estimates in the consolidated financial statements.

However, said notes do not contain any content related to the fiscal year ended March 31, 2020 in accordance with the transitional treatment stipulated in the proviso of Paragraph 11 of the Standard.

## (v) Additional information

(Inappropriate accounting practices at the Company's consolidated subsidiaries)

The Company discovered that inappropriate accounting was conducted at its consolidated subsidiary, Kantatsu Co. Ltd. and its subsidiaries (hereinafter "Kantatsu Group") and therefore launched an investigation committee that includes external lawyers and accountants on December 25, 2020, and started the investigation. The investigation report received from the committee on March 12, 2021 identified that the Kantatsu Group had recorded sales for which there were no purchase orders from trading firms (the customers), nor product shipments. The inappropriate accounting practices pointed out in the report also include the recording of sales upon shipment to trading firms, although there were special provisions that allowed trading firms to return products when they could not resell them to third parties, which indicate sales were supposed to be recognized when the products were resold.

Following the investigation results, the Company corrected the Kantatsu Group's inappropriate accounting figures from previous fiscal years and recorded a valuation loss on related inventories as well as an impairment loss on non-current assets. Along with that, corrections were made to other items that had not been corrected as they had no materiality on previous consolidated financial statements. On March 15, 2021, the Company restated financial statements for previous fiscal years that reflected those corrections.

Reflecting the above-stated corrections, for the fiscal year ended March 31, 2019, the Company recognized decreases in net sales by ¥5,304 million, operating profit by ¥6,751 million, ordinary profit by ¥6,162 million, and profit attributable to owners of parent by ¥10,214 million, total assets by ¥17,797 million, and net assets by ¥15,140 million, respectively, compared to the figures before the corrections.

In addition, for the fiscal year ended March 31, 2020, the Company recognized decreases in net sales by ¥8,963 million, operating profit by ¥1,309 million, ordinary profit by ¥5,365 million, profit attributable to owners of parent by ¥7,232 million, total assets by ¥20,441 million, and net assets by ¥24,179 million, respectively, compared to the figures before the corrections.

(Accounting Estimates on the Impact of the Spread of the New Coronavirus Pandemic)

In the impairment tests of non-current assets, the Company made accounting estimates on future cash flows based on multiple scenarios, assuming that the impact of the spread of new coronavirus pandemic will continue for a certain period in the fiscal year ended March 31, 2022 and beyond. However, since there are a lot of uncertainties regarding the impact of the spread of the new coronavirus pandemic, the accounting judgment revisions based on changes in the situations may lead to significant impacts on the Group's financial status and operating results in the fiscal year ended March 31, 2022 and beyond.

The Company entered into long-term contracts with several suppliers with respect to electricity and other inputs at the Sakai Plant. The total amounts of future minimum payments under such contracts as of March 31, 2020 and 2021 were ¥16,738 million (longest remaining term was 9 years) and ¥12,262 million (longest remaining term was 8 years), respectively. No contract can be terminated before expiration.

# Notes to Consolidated Financial Statements

## (e) Investment commitment

The Company entered into contract to participate in the SoftBank Vision Fund, a private fund established by SoftBank Group Corp., in May 2017. Total amount of investment commitment is USD 1 billion. The balance of remaining committed contribution as of March 31, 2020 and 2021 were as follows:

Conversion to yen is calculated based on market exchange rate as of closing dates.

	Yen (millions)	
	2020	2021
Total amount of investment commitment	¥ 107,830	¥ 109,720
Contribution made	89,936	93,740
Remaining committed contribution	¥ 17,893	¥ 15,979

(Changes in presentation method)

"Outsourcing expenses" has been presented separately as a major component because the amount exceeds 10/100 of the total selling, general and administrative expenses for the fiscal year ended March 31, 2021.

## (c) Research and development expenses

Research and development expenses included in general and administrative expenses and cost of manufacturing were ¥100,591 million for the fiscal year ended March 31, 2020 and ¥86,793 million for the fiscal year ended March 31, 2021.

## (d) Share of loss of entities accounted for using the equity method

This item includes ¥14,449 million, which is the equivalent amount of the Company's interest in an impairment loss on non-current assets of ¥58,854 million posted by Sakai Display Products Corporation (hereinafter, SDP), an equity-method affiliate.

SDP has determined that there are indications of impairment with non-current assets, because of loss from operating activities in each of the past two consecutive years, mainly due to falling prices of large LCD panels, which is its key products. As a result of determination on the recognition and measurement of impairment loss, the book value of non-current assets has been reduced to the value in use. The value in use of non-current assets is calculated by the discounted present value of future cash flow, which is estimated based on future business plans. The estimates include important assumptions such as the types, selling prices, and sales volumes of products to be sold in the future, as well as market growth rates and discount rates.

## 3. Notes to Consolidated Statements of Operations

### (a) Inventory valuation loss

Inventories at the end of the fiscal year is presented as the amount after deducting valuation loss.

Net inventory valuation loss (after offsetting the reversal amount) included in the cost of sales for the fiscal years ended March 31, 2020 and 2021 were as follows:

	Yen (millions)	
	2020	2021

## (h) Impairment loss

With regards to accounting for impairment of assets, the Company and its consolidated subsidiaries identify cash generating units through consideration of business characteristics and business operations. Idle assets are identified as separate cash generating units.

A consolidated subsidiary in China recognized an impairment loss of ¥384 million for the Smart Life unit, with the book value reduced to the recoverable value, due to the future production plan change for the fiscal year ended March 31, 2020. Details were ¥374 million for machinery, equipment and vehicles, and ¥10 million for tools, furniture and fixtures. Although the recoverable value was

measured based on value in use, no discount rate was applied to the future cash flow in measuring the value in use, because the assets had a short remaining useful life and the discount rate was not important in calculating the recoverable value.

Some consolidated subsidiaries in China and Japan recognized an impairment loss of ¥3,018 million for the Smart Life unit, for the fiscal year ended March 31, 2020, with the book value reduced to the recoverable value, because the investment amount became unrecoverable due to their decreasing profitability. Details were ¥296 million for buildings and structures, ¥975 million for machinery, equipment and vehicles, ¥1,026 million for tools, furniture and fixtures, and ¥720 million for other. The estimated recoverable amount was evaluated to be the net realizable value.

A business in Hiroshima, Japan, where the cash generating unit is identified on a consolidated basis, recognized an impairment loss of ¥2,891 million for the Smart Life unit, for the fiscal year ended March 31, 2021, with the book value reduced to the recoverable value, because the investment amount became unrecoverable due to the decreasing profitability of a consolidated subsidiary. Details were ¥2,493 million for buildings and structures, ¥327 million for machinery, equipment and vehicles, ¥24 million for tools, furniture and fixtures, ¥46 million for land, and ¥0 million for other. The estimated recoverable amount was evaluated to be the net realizable value based on appraisals, etc.

A consolidated subsidiary in China recognized an impairment loss of ¥2,218 million for the Smart Life, 8K Ecosystem, and ICT units for the fiscal year ended March 31, 2021, with the book value reduced to the recoverable value, because the investment amount became unrecoverable due to their decreasing profitability. Details were ¥2,056 million for machinery, equipment and vehicles and ¥161 million for other. The estimated recoverable amount was evaluated with the net realizable value as zero.

Some consolidated subsidiaries in China and Japan recognized an impairment loss of ¥1,188 million for the Smart Life unit for the fiscal year ended March 31, 2021, with the book value reduced to the recoverable value, because the investment amount became unrecoverable due to their decreasing profitability. Details were ¥314 million for machinery, equipment and vehicles, ¥799 million for tools, furniture and fixtures, and ¥74 million for other. The estimated recoverable amount was evaluated with the net realizable value as zero.

Impairment losses other than those stated above are omitted as they are immaterial.

## 8. Financial Instruments

### (a) Qualitative information on financial instruments

#### (1) Policies for financial instruments

The Company and its consolidated subsidiaries obtain necessary funds mainly through bank loans, according to its capital investment plan for its main business of manufacturing and distributing electronic communication equipment, electronic equipment, electronic application equipment and electronic components. Short-term operating funds are obtained through bank loans. Transactions involving such financial instruments are conducted with creditworthy financial institutions.

The Company utilizes derivative transactions for minimizing risks and does not intend to use them for speculative or dealing purposes.

#### (2) Description and risks of financial instruments

Notes and accounts receivable are exposed to customer credit risks. Some notes and accounts receivable are denominated in foreign currencies because the Company conducts business globally and, therefore, is exposed to foreign currency risks. Notes and accounts payable - trade and electronically recorded obligations - operating are due within one year. Some notes and accounts payable arising from the import of raw materials, etc. are denominated in foreign currencies and, therefore, are exposed to foreign currency risks. The Company makes use of forward exchange contracts to hedge the foreign currency risk exposure on the net position of foreign currency denominated notes and accounts receivable and notes and accounts payable.

Other securities are held for long term to develop better business alliances and relationships with the Company's customers and suppliers. Other securities are exposed to market price fluctuation risks. Long-term borrowings are mainly for capital investments. The longest repayment term is 5 years and 1 month from March 31, 2021.

# Notes to Consolidated Financial Statements

Derivative transactions consist primarily of forward exchange contracts, which are used to hedge the foreign currency risk exposure, and interest rate swaps. For hedging instruments, hedged items, hedging policies and assessment methods of effectiveness of hedging instruments, see "(n) Hedge accounting" in "1. Summary of Significant Accounting and Reporting Policies".

## (3) Risk management of financial instruments

### i) Management of credit risks

For notes and accounts receivable, the Finance Division and Accounting Division of Finance and Administration Office of the Company periodically reviews the status of its key customers, monitoring their respective payment deadlines and remaining outstanding. The Company strives to recognize and reduce the risks of irrecoverability as a result of deteriorating financial conditions or other factors at an early stage. The Company's consolidated subsidiaries also follow the same monitoring and administration process.

### ii) Management of market risks

The Company decides basic policies for derivative transactions at the Foreign Exchange Administration Committee meeting and the Finance Administration Committee meeting which are required to be held monthly by the Company's internal procedure. The Finance Division of Finance and Administration Office executes transactions and reports the results of such transactions to the Accounting Division of Finance and Administration Office on a daily basis. The Accounting Division has set up a specialized section for monitoring transaction results and position management and reports the results of transactions to the head of Finance and Administration Office on a daily basis.

In addition, the Finance Division reports the results of transactions to the Foreign Exchange Administration Committee and the Finance Administration Committee on a monthly basis. Its consolidated subsidiaries also manage forward foreign exchange transactions in accordance with the rules established by the Company and report the content of such transactions to the Company on a monthly basis.

For other securities and investments in capital, the Company monitors their fair values and the issuers' financial position, and continually reviews the need to increase or decrease the holdings of such financial instruments based on the factors mentioned above as well as the relationship with the issuers.

### iii) Management of liquidity risks in financing activities

The Finance Division manages liquidity risks by preparing and updating cash management plans based on reports from each section and by maintaining liquidity on hand.

## (4) Supplementary explanation of fair value of financial instruments

The fair value of financial instruments is based on the quoted market price in an active market other than when a market price is not available, in which case the fair value is reasonably estimated. Since variable factors are incorporated in the determination of this reasonably estimated price, the valuation may vary if different assumptions were to be used.

The contract amounts themselves may not reflect the market risks associated with derivative transactions.

## (b) Fair value of financial instruments

The consolidated balance sheet amounts, fair values and differences between the two as of March 31, 2020 and 2021 are included in the tables below. Financial instruments for which fair values are considered extremely difficult to be estimated are not included in the tables. Refer to Note 2 below for the details of such financial instruments.

Note 1 Methods of calculating the fair value of financial instruments and matters related to securities and derivative transactions

## (1) Cash and deposits

Book value is used, because the fair value of deposits approximates their book value due to their short maturity periods.

## (2) Notes and accounts receivable — trade

Book value is used, because the fair value of notes and accounts receivable — trade due within a year approximates their book value. The fair value of notes and accounts receivable with long maturity periods is discounted using a rate which reflects both the period until maturity and credit risk.

## (3) Investment securities

The fair value of investment securities is based on the average quoted market price during the last month of the fiscal year.

## (4) Notes and accounts payable — trade

Book value is used, because the fair value of notes and accounts payable - trade approximates their book value due to their short maturity periods.

## (5) Electronically recorded obligations — operating

Book value is used, because the fair value of electronically recorded obligations — operating approximates their book value due to their short maturity periods.

## (6) Short-term borrowings

Book value is used, because the fair value of short-term borrowings approximates their book value due to their short maturity periods.

## (7) Long-term borrowings

The fair value of long-term borrowings is determined by the present value of the total amount of the principal and interest discounted at the rate which would apply if similar borrowings were newly made.

## (8) Derivative transactions

The fair values of forward exchange contracts are calculated based on forward exchange market rates. The fair value of interest rate swaps is calculated based on the asking price offered by the financial institutions with which the Company enters into such transactions.

Note 2 Financial instruments of which fair values are considered extremely difficult to be estimated are unlisted stocks of ¥64,109 million as of March 31, 2020 and ¥48,331 million as of March 31, 2021, and investments in capital of ¥92,758 million as of March 31, 2020 and ¥75,600 million as of March 31, 2021. Since there are no available quoted market prices and it is extremely difficult to estimate their fair values, they are not included in "(3) Investment securities".

## 16. Segment Information

### (a) General information about reportable segments

The Company's reportable segments are components of the Group for which discrete financial information is available and whose operating results are reviewed regularly by the Board of Directors. The Board uses this information to make decisions about resources to be allocated among the segments and to assess segment performance.

The Company has united for transformation, pursuing the business vision of Changing the World with 8K+5G and AIoT through initiatives to (1) expand our business globally, (2) create new businesses, (3) engage in M&A and alliances, and (4) strengthen our competitive position. To achieve this vision, the Company defined three business domains as reportable segments: Smart Life, 8K Ecosystem, and ICT.

Beginning with the third quarter of the consolidated accounting period, the COCORO service business (formerly under Smart Life) is now included in the 8K Ecosystem business segment to conform with the reorganization.

Segment information for the fiscal year ended March 31, 2020 is stated based on the reclassified segments after the change.

# Notes to Consolidated Financial Statements

## (b) Basis of measurement of reportable segment sales, income or loss, segment assets and other material items

The accounting policies for the reportable segments are consistent with the Company's accounting policies used in the preparation of its consolidated financial statements. Intersegment sales and income (loss) are recognized based on properly negotiated prices.

Depreciable assets of the administration groups of the Company's headquarters are not allocated to reportable segments. However, depreciation and amortization of these assets are properly allocated to reportable segments.

## 19. Significant Subsequent Events

### (a) Change of segment

In the fiscal year ended March 31, 2020, the Company operated in three reportable business segments — Smart Life, 8K Ecosystem, and ICT. Starting from the fiscal year ended March 31, 2022, reportable business segments have been changed to the following five: Smart Life, 8K Ecosystem, ICT, Display Device, and Electronic Device.

This change is in line with the Direction of Business Management and Initiatives in FY2021 announced on May 11, 2021, which aims to build a business structure centered on the brand business in order to establish “powerful brand company ‘SHARP’” that is closest to people and society, and constantly proposing new value, at an early date.

The major difference is the reclassification of the Devices business (formerly under Smart Life) under the Electronic Device business segment. The Display Device business (formerly under 8K Ecosystem) is now under the Display Device business segment.

Information on net sales, income or loss of each reclassified reportable segment for the fiscal year ended March 31, 2021 is as follows.

	Yen (millions) 2021
Net sales:	
Smart Life:	
Customers	¥ 454,510
Intersegment	1,033

Intersegment	50,044
Total	<b>428,578</b>
Adjustment	<b>(107,551)</b>
Consolidated net sales	<b>¥ 2,425,910</b>
Segment income (loss):	
Smart Life	¥ 58,866
8K Ecosystem	15,527
ICT	15,421
Display Devices	1,860
Electronics Devices	12,692
Adjustment	<b>(21,256)</b>
Consolidated operating profit	<b>¥ 83,112</b>

Adjustments of segment income (loss) of ¥(21,256) million include elimination of intersegment transactions of ¥40 million and corporate expenses not allocated to each reportable segment of ¥(18,831) million. Corporate expenses are mainly attributable to basic R&D expenses and expenses related to the administrative groups of the Company's headquarters.

#### **(b) Transfer of equity of important subsidiaries**

Kantatsu Corporation, a consolidated subsidiary of the Company (hereinafter, "Kantatsu"), announced on June 29, 2021 that it had decided on the transfer of all of its equity in its subsidiary Lianyungang Kantatsu Fine Technology Co., Ltd. (hereinafter, "Lianyungang") to Liaoning Zhonglan Electronic Technology Co., Ltd. (hereinafter, "ZET") (hereinafter, the Transfer) and signed an agreement with ZET.

Upon the completion of the Transfer, Lianyungang will be excluded from the scope of consolidation of the Company.

##### **(1) Reason for the Transfer**

Kantatsu manufactures and sells micro lens units mounted on smartphones. In order to address sluggish business performance amid the intensifying competitive environment and deterioration of its financial position as a consequence of inappropriate accounting, Kantatsu is moving ahead with drastic structural reforms. As part of the reforms, Kantatsu has been making efforts to improve its financial position by transferring its equity in Lianyungang, which requires continuous significant investments.

As a result, Kantatsu has decided to transfer its equity in Lianyungang to ZET, one of the leading VCM (Voice Coil Motor) manufacturers in China, which plans to expand its lens business.

##### **(2) Overview of the subsidiary transferred**

Name:	Lianyungang Kantatsu Fine Technology Co., Ltd.
Main field of business:	Manufacture and sale of micro lens units
Business relationship:	The Company purchases micro lens units from Kantatsu, its parent company.

##### **(3) Overview of the transferee**

Name:	Liaoning Zhonglan Electronic Technology Co., Ltd.
Main field of business:	Design, development, manufacture, and sale of parts and components for smartphone devices
Business relationship:	Not applicable.

##### **(4) Summary of the Transfer**

Equity before the Transfer	100%
Equity after the Transfer	0%

\* The transfer price is not disclosed because of confidentiality obligations.
