2. Reason for revision

We revised the previously announced forecast as we anticipate worsening profits due to delay in taking action for greater-than-expected changes in business environment, such as rapid fluctuations in exchange rates and a price decline in small- and medium-size LCD business.

The fourth quarter figures of the year ending March 31, 2015, are based on an exchange rate of ¥120=US\$ 1.00.

Note: The above forecast is based on certain information available to the Company at the time of announcement, and actual operating results may differ from the forecast due to various factors.

- The economic situation in which the Sharp Group operates
- Sudden, rapid fluctuations in demand for products and services, as well as intense price competition
- Changes in exchange rates (particularly between the yen and the U.S. dollar, the euro and other currencies)
- Regulations such as trade restrictions in other countries
- The progress of collaborations and alliances with other companies
- Litigation and other legal proceedings against the Sharp Group
- Rapid technological changes in products and services, etc.
