SHARP

XG-C430X/XG-C330X True XGA Portable LCD Projectors

High-Brightness, High-Quality Projectors Even in a Compact Body Provide Business Mobility As Well As Facilitate Network Control and Maintenance for Conference Rooms

High-Brightness, High-Quality Performance in a Compact and Lightweight Body with Ease of Operation, Maintenance and Network Controls

High-Brightness Performance in Such a Compact Body

4,000 ANSI Lumen (XG-C430X)/3,300 ANSI Lumen (XG-C330X) High Brightness

Sharp's optoelectronics technology in a three-LCD projection system maximizes light output. This technology provides efficient 4,000 ANSI lumen brightness, delivering a bright, easy-to-see image even in large, brightly lit rooms.

Compact and Lightweight Body

Sharp's optical mechanism achieves an amazingly compact, lightweight body, which can be carried easily, while the recessed lens provides extensive protection against accidental damage.

Useful Features

Direct Power Off Function

The Direct Power Off function provides convenience for a variety of applications by keeping the cooling fan operating even after the power supply has been turned off. This lets users immediately unplug the projector and take it from the location because there is no need to wait for the projector to cool down. Along with Direct Power Off, the Direct Power On function also helps control the power simultaneously for multiple projectors by using the room's primary power switch.

Eco Quiet Mode Direct Button

Eco Quiet Mode extends the LCD and lamp life and reduces fan noise. With the Direct Buttons built into both the projector and the remote control, this mode can be conveniently turned on or off at any time.

31dB Low Fan Noise (Eco Quiet Mode On)

Use of separate cooling systems for each RGB LCD panel achieves low fan noise.

Easy Setting

● Auto Keystone Correction

Automatically adjusts projected images to compensate for distortion.

● New Tilt Leveler

Easily levels tilted images.

Flexible Presentation

● Mouse Control

The computer mouse function enables a projector to be controlled remotely using a built-in USB terminal. In addition, by using an optional AN-MR2 remote IR receiver, even when the projector is mounted on a desktop or ceiling and regardless of USB cable length.

Compact and Lightweight

Easy Operation and Installation

Four Optional Lenses and Easy Replacement System

The projector may be used with four optional interchangeable lenses to meet a wide variety of applications and projection situations. The lenses cover projection distances from 9.11 ft (3.0 m) to 48.4 ft (14.7 m) for a 100" screen.

And, it is amazingly easy to change lenses. Just detach the cover and turn the lever. Anytime you enter a new presentation venue, you can simply relax and quickly change to the lens which best suits your projection conditions such as the room size, projection distance and projected picture size.

Side Access Lamp and Filter

The lamp and filter in the XG-C430X and the XG-C330X can be easily replaced while the projector is on a tabletop or when even ceiling mounted.

SHARP Unique Network System

Web Browser Control

Web browser control enables remote access and management of the projector by utilizing built-in firmware without the need for additional special software.

Remote Access for Control and Adjustment

Projector control functions, including power on, input select, volume, and AV mute, can be controlled and adjusted by a computer even in another room.

Diagnosis and Auto Email Alert

Email is automatically sent to appointed addresses when detecting an error message, such as the lamp going out, unusual heating or cooling fan breakdown.

Link to a Specific Website for Service and Support

The projector can be registered to a specific website for maintenance service and support. For example, the projector can send an error message, such as to notify that the lamp is burnt out, to a web address automatically selected. The address accessed for maintenance is also shown on the display.

A Wide Variety of Interfaces

Variety of Interfaces

With a DVI digital terminal compatible with conventional players and computers, the XG-C430X and the XG-C330X are equipped with various video inputs, including composite inputs and four discrete stereo audio inputs.

Control with Downloadable Display Manager

A greater variety of network projector control options can be used when the Sharp Display Manager* is installed on the main computer.

* Sharp Display Manager can be downloaded from the Sharp Global Home Page for free. Sharp Global Homepage URL: <http://sharp-world.com/projector>

Remote Access for Multiple and Group Projector Control

A management computer can control multiple projectors simultaneously.

Periodic/Error Diagnosis and Auto Email Alert

The Display Manager sends periodic reports and an error message as well as directly adjusts the projector gamma values and other projector conditions.

Theft Detection and Message (Network Surveillance System)

A warning message will appear on the screen of a computer when projector cables are disconnected.

PJLink™ Capability

The XG-C430X and XG-C330X are compatible with devices that support PJLink™, enabling systems to be easily built for centralized management and operation using a controller.

For additional information about the PJLink™, visit <http://pjlink.jbmia.or.jp/english/>

Control System Compatibility

The XG-C430X and XG-C330X provides superior compatibility with various control systems such as Crestron, AMX and Extron.

Security and Safety (Notevision Security Pack)

Notevision Lockdown Function

The optical unit provides a solid mounting point for ceiling mount hardware, and the joint area is reinforced by a metal plate. A strong mount deters theft.

When a projector is subjected to a force of 7,000 N (714 kgf)

The conventional model is damaged.

The XG-C430X and XG-C330X remain undamaged.
