IMPORTANT

• For your assistance in reporting the loss or theft of your Projector, please record the Model and Serial Numbers located on the bottom of the projector and retain this information.
• Before recycling the packaging, please ensure that you have checked the contents of the carton thoroughly against the list of “Supplied accessories” on page 10.

Model No.:
Serial No.:

SPECIAL NOTE FOR USERS IN THE U.K.
The mains lead of this product is fitted with a non-rewireable (moulded) plug incorporating a 10A fuse. Should the fuse need to be replaced, a BSI or ASTA approved BS 1362 fuse marked or and of the same rating as above, which is also indicated on the pin face of the plug, must be used. Always refit the fuse cover after replacing the fuse. Never use the plug without the fuse cover fitted. In the unlikely event of the socket outlet in your home not being compatible with the plug supplied, cut off the mains plug and fit an appropriate type.

DANGER:
The fuse from the cut-off plug should be removed and the cut-off plug destroyed immediately and disposed of in a safe manner. Under no circumstances should the cut-off plug be inserted elsewhere into a 10A socket outlet, as a serious electric shock may occur. To fit an appropriate plug to the mains lead, follow the instructions below:

WARNING:
THIS APPARATUS MUST BE EARTHED.

IMPORTANT:
The wires in this mains lead are coloured in accordance with the following code:
Green-and-yellow : Earth / Blue : Neutral / Brown : Live
As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:
• The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol or coloured green or green-and-yellow.
• The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
• The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

IF YOU HAVE ANY DOUBT, CONSULT A QUALIFIED ELECTRICIAN.

The supplied CD-ROM contains operation instructions in English, German, French, Spanish, Italian, Dutch, Swedish, Portuguese, Chinese and Korean. Carefully read through the operation instructions before operating the projector.

Le CD-ROM fourni contient les instructions de fonctionnement en anglais, allemand, français, espagnol, italien, néerlandais, suédois, portugais, chinois et coréen. Veuillez lire attentivement ces instructions avant de faire fonctionner le projecteur.

Den medföljande CD-ROM-skivan innehåller bruksanvisningar på engelska, tyska, franska, spanska, italienska, holländska, svenska, portugisiska, kinesiska och koreanska. Läs noga igenom bruksanvisningen innan projektorn tas i bruk.

El CD-ROM suministrado contiene instrucciones de operación en inglés, alemán, francés, español, italiano, holandés, sueco, portugués, chino y coreano. Lea cuidadosamente las instrucciones de operación antes de utilizar el proyector.

Il CD-ROM in dotazione contiene istruzioni di operazione in inglese, tedesco, francese, spagnolo, italiano, olandese, svedese, portoghese, cinese e coreano. Leggere attentamente le istruzioni per l’uso prima di usare il proiettore.

O CD-ROM fornecido contém instruções de operação em Inglês, Alemão, Francês, Espanhol, Italiano, Holandês, Sueco, Português, Chínês e Coreano. Leia cuidadosamente todas as instruções de operação antes de operar o projetor.

附属之CD-ROM光碟中，有用英文、德文、法文、西班牙文、意大利文、荷蘭文、瑞典文、葡萄牙文、中文和韓文所寫的使用說明書。在操作本投影機之前，請務必仔細閱讀整本使用說明書。

제공된 CD-ROM에는 영어, 독일어, 프랑스어, 스페인어, 이탈리아어, 네덜란드어, 스페인어, 포르투갈어, 중국어, 그리고 한국어로 작성된 조작 설명서가 포함되어 있습니다. 프로젝터를 조작하기 전에 조작 지침을 상세하게 숨지하십시오.
## Introduction

Before using the projector, please read this operation manual carefully.

### There are two important reasons for prompt warranty registration of your new SHARP Projector, using the REGISTRATION CARD packed with the projector.

1. **WARRANTY**  
   This is to assure that you immediately receive the full benefit of the parts, service and labor warranty applicable to your purchase.

2. **CONSUMER PRODUCT SAFETY ACT**  
   To ensure that you will promptly receive any safety notification of inspection, modification, or recall that SHARP may be required to give under the 1972 Consumer Product Safety Act, PLEASE READ CAREFULLY THE IMPORTANT “LIMITED WARRANTY” CLAUSE.

### WARNING:
- High brightness light source. Do not stare into the beam of light, or view directly. Be especially careful that children do not stare directly into the beam of light.

### WARNING:
- To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.

### CAUTION:
- To reduce the risk of electric shock, do not remove cover. No user-serviceable parts except lamp unit. Refer servicing to qualified service personnel.

### INFORMATION
- This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the operation manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

- The enclosed computer cable must be used with the device. The cable is provided to ensure that the device complies with FCC Class A verification.

### WARNING:
- This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.
WARNING:
The cooling fan in this projector continues to run for about 90 seconds after the projector enters the standby mode. During normal operation, when putting the projector into standby mode always use the STANDBY button on the projector or on the remote control. Ensure the cooling fan has stopped before storing the projector in the storage case.
DURING NORMAL OPERATION, NEVER TURN THE PROJECTOR OFF BY DISCONNECTING THE POWER CORD. FAILURE TO OBSERVE THIS WILL RESULT IN PREMATURE LAMP FAILURE.

PRODUCT DISPOSAL
This product utilizes tin-lead solder, and lamp containing a small amount of mercury. Disposal of these materials may be regulated due to environmental considerations. For disposal or recycling information, please contact your local authorities, the Electronics Industries Alliance: www.eiae.org, the lamp recycling organization www.lamprecycle.org, or Sharp at 1-800-BE-SHARP.

Caution Concerning Lamp Replacement
See “Replacing the Lamp” on page 60.

This SHARP projector uses an LCD (Liquid Crystal Display) panel. This very sophisticated panel contains 786,432 pixels (x RGB) TFT's (Thin Film Transistors). As with any high technology electronic equipment such as large screen TVs, video systems and video cameras, there are certain acceptable tolerances that the equipment must conform to. This unit has some inactive pixels within acceptable tolerances which may result in inactive dots on the picture screen. This will not affect the picture quality or the life expectancy of the unit.

PDF operation manuals in several languages are included in the CD-ROM, so that you can work with the projector. To utilize these manuals, you need to install Adobe® Reader® on your computer (Windows® or Macintosh®).

Please download Adobe® Reader® from the Internet (http://www.adobe.com).

Accessing the PDF Manuals

For Windows®:
① Insert the CD-ROM in the CD-ROM drive.
② Double click the “My Computer” icon.
③ Double click the “CD-ROM” drive.
④ **When you want to view the operation manual**
   1) Double click the “MANUALS” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the projector manuals.

   **When you want to view the setup manual**
   1) Double click the “SETUP” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the setup manual.

For Macintosh®:
① Insert the CD-ROM in the CD-ROM drive.
② Double click the “CD-ROM” icon.
③ **When you want to view the operation manual**
   1) Double click the “MANUALS” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the projector manuals.

   **When you want to view the setup manual**
   1) Double click the “SETUP” folder.
   2) Double click the language (name of the folder) that you want to view.
   3) Double click the pdf file to access the setup manual.

💡 Info

- If the desired pdf file cannot be opened by double clicking the mouse, start Adobe® Reader® first, then specify the desired file using the “File”, “Open” menu.
CAUTION: Please read all of these instructions before you operate this product and save these instructions for later use.

Electrical energy can perform many useful functions. This product has been engineered and manufactured to assure your personal safety. BUT IMPROPER USE CAN RESULT IN POTENTIAL ELECTRICAL SHOCK OR FIRE HAZARDS. In order not to defeat the safeguards incorporated in this product, observe the following basic rules for its installation, use and servicing.

1. Read Instructions
   All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions
   The safety and operating instructions should be retained for future reference.

3. Heed Warnings
   All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions
   All operating and use instructions should be followed.

5. Cleaning
   Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

6. Attachments
   Do not use attachments not recommended by the product manufacturer as they may cause hazards.

7. Water and Moisture
   Do not use this product near water—for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement; or near a swimming pool; and the like.

8. Accessories
   Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.

9. Transportation
   A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Ventilation
    Slots and openings in the cabinet are provided for ventilation to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.

11. Power Sources
    This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power source to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

12. Grounding or Polarization
    This product is provided with one of the following types of plugs. If the plug should fail to fit into the power outlet, please contact your electrician. Do not defeat the safety purpose of the plug.
    a. Two-wire type (mains) plug.
    b. Three-wire grounding type (mains) plug with a grounding terminal.
    This plug will only fit into a grounding type power outlet.

13. Power-Cord Protection
    Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Lighting
    For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the cable system. This will prevent damage to the product due to lightning and power-line surges.

15. Overloading
    Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

16. Object and Liquid Entry
    Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

17. Servicing
    Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service
    Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
    a. When the power-supply cord or plug is damaged.
    b. If liquid has been spilled, or objects have fallen into the product.
    c. If the product has been exposed to rain or water.
    d. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.
    e. If the product has been dropped or damaged in any way.
    f. When the product exhibits a distinct change in performance, this indicates a need for service.

19. Replacement Parts
    When replacement parts are required, ensure that the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check
    Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Wall or Ceiling Mounting
    This product should be mounted to a wall or ceiling only as recommended by the manufacturer.

22. Heat
    This product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.
Ensure that you read the following safeguards when setting up your projector.

Caution concerning the lamp unit
■ Potential hazard of glass particles if lamp ruptures. In case of lamp rupture, contact your nearest Sharp Authorized Projector Dealer or Service Center for replacement. See “Replacing the Lamp” on page 60.

Caution concerning the setup of the projector
■ For minimal servicing and to maintain high image quality, SHARP recommends that this projector be installed in an area free from humidity, dust and cigarette smoke. When the projector is subjected to these environments, the vents and lens must be cleaned more often. As long as the projector is regularly cleaned, use in these environments will not reduce the overall operation life of the unit. Internal cleaning should only be performed by a Sharp Authorized Projector Dealer or Service Center.

Do not set up the projector in places exposed to direct sunlight or bright light.
■ Position the screen so that it is not in direct sunlight or room light. Light falling directly on the screen washes out the colors, making viewing difficult. Close the curtains and dim the lights when setting up the screen in a sunny or bright room.

The projector may be safely tilted to a maximum angle of 9 degrees.
■ Placement should be within ±9 degrees of horizontal.

When using the projector in high-altitude areas such as mountains (at altitudes of approximately 1,500 meters (4,900 feet) or more)
■ When you use the projector in high-altitude areas with thin air, set “Fan Mode” to “High”. Neglecting this can affect the longevity of the optical system.

Warning about placing the projector in a high position
■ When placing the projector in a high position, make certain it is carefully secured to avoid personal injury caused by the projector falling down.

Do not subject the projector to hard impact and/or vibration.
■ Take care with the lens so as not to hit or damage the surface of the lens.

Rest your eyes occasionally.
■ Continuously watching the screen for long hours will cause eye strain. Take regular breaks to rest your eyes.

Avoid locations with extremes of temperature.
■ The operating temperature of the projector is from 41°F to 95°F (+5°C to +35°C).
■ The storage temperature of the projector is from −4°F to 140°F (−20°C to +60°C).

Do not block the intake and exhaust vents.
■ Allow at least 7 7/8 inches (20 cm) of space between the exhaust vent and the nearest wall or obstruction.
■ Ensure that the intake vent and the exhaust vent are not obstructed.
■ If the cooling fan becomes obstructed, a protection circuit will automatically put the projector into standby mode to prevent overheating damage. This does not indicate a malfunction (see pages 58 and 59). Remove the projector power cord from the wall outlet and wait at least 10 minutes. Place the projector where the intake and exhaust vents are not blocked, plug the power cord back in and turn on the projector. This will return the projector to the normal operating condition.
Caution regarding usage of the projector
■ When using the projector, take care not to subject it to hard impact and/or vibration, as this can result in damage. Take extra care with the lens. If you are not to use the projector for a long time, make certain you unplug the power cord from the wall outlet, and disconnect any other cables connected to it.
■ Do not carry the projector by holding the lens.
■ When storing the projector, ensure you attach the lens cap to the projector. (See page 12.)
■ Do not expose the storage case or projector to direct sunlight or near heat sources. The storage case or projector may change color or become deformed.

Other connected equipment
■ When connecting a computer or other audio-visual equipment to the projector, make the connections AFTER unplugging the power cord of the projector from the AC outlet and turning off the equipment to be connected.
■ Please read the operation manuals of the projector and the equipment to be connected for instructions on how to make the connections.

Using the projector in other countries
■ The power supply voltage and the shape of the plug may vary depending on the region or country you are using the projector in. When using the projector overseas, make sure you use an appropriate power cord for the country you are in.

Temperature monitor function
■ If the projector starts to overheat due to setup problems or blockage of the air vents, and will illuminate in the lower left corner of the picture. If the temperature continues to rise, the lamp will turn off, the temperature warning indicator on the projector will blink, and after a 90-second cooling-off period the projector will enter the standby mode. Refer to “Maintenance Indicators” on page 58 for details.

Info
- The cooling fan regulates the internal temperature, and its performance is automatically controlled. The sound of the fan may change during projector operation due to changes in the fan speed. This does not indicate malfunction.
- Even if you unplug the power cord after projector operation, the cooling fan continues to run for a while. When you place the projector into the storage case, make sure that the cooling fan has stopped.
## Accessories

### Supplied accessories

- **Remote control**
  - <RRMCGA623WJSA>
- **Two R-6 batteries**
  - (“AA” size, UM/SUM-3, HP-7 or similar)
- **Power cord* (1)**
  - For U.S., Canada, etc.
  - (6' (1.8 m))
  - <QACCDA007WJPZ>
- **Power cord* (2)**
  - For Europe, except U.K.
  - (6' (1.8 m))
  - <QACCVA011WJPZ>
- **Power cord* (3)**
  - For U.K., Hong Kong and Singapore
  - (6' (1.8 m))
  - <QACCBA036WJPZ>
- **Power cord* (4)**
  - For Australia, New Zealand and Oceania
  - (6' (1.8 m))
  - <QACCLA018WJPZ>

* Use the power cord that corresponds to the wall outlet in your country.

- **DIN-D-sub RS-232C adaptor**
  - (5 57/64" (15 cm))
  - <QCNWGA091WJPZ>
- **3 RCA to 15-pin D-sub cable**
  - (10' (3.0 m))
  - <QCNWGA045WJPZ>
- **RGB cable**
  - (10' (3.0 m))
  - <QCNWGA045WJPZ>
- **Lens cap (attached)**
  - <PCAPHA026WJSA>
- **Lens cap strap**
  - <UBNDSA017WJZZ>
- **Storage case**
  - <GCASNA020WJSA>

*Operation manual (this manual <TINS-D310WJZZ> and CD-ROM <UDSKAA092WJZZ>)*

### Optional accessories

- **3 RCA to 15-pin D-sub cable (10' (3.0 m))**
  - AN-C3CP2
- **Remote receiver**
  - AN-MR2
- **Lamp unit**
  - AN-C430LP
- **Ceiling-mount adaptor**
  - AN-60KT
  - AN-XGCM55 (for U.S.A. only)
  - AN-JT200 (for U.S.A. only)
  - AN-TK201 <for AN-60KT>
  - AN-TK202 <for AN-60KT>
  - AN-EP101B <for AN-XGCM55 and AN-JT200> (for U.S.A. only)
- **Universal bracket**
- **Ceiling-mount unit**

### Note

- Codes in “< >” are Replacement parts codes.

### Note

- Some of the optional accessories may not be available depending on the region. Please check with your nearest Sharp Authorized Projector Dealer or Service Center.
Optional lenses

Part Names and Functions

Numbers in refer to the main pages in this operation manual where the topic is explained.

Projector

Top View

- **Power indicator**
- **STANDBY/ON button**
  For turning the power on and putting the projector into standby mode.
- **KEYSTONE button**
  For entering the Keystone Correction mode.
- **Adjustment buttons (↑/↓/←/→)**
  For selecting and adjusting on-screen items.
- **RETURN button**
  For returning to the previous display.
- **INPUT buttons**
  For switching input mode.
- **Lamp indicator**
- **Temperature warning indicator**
- **AUTO SYNC button**
  For automatically adjusting images when connected to a computer.
- **ENTER button**
  For setting items selected or adjusted on the menu.
- **Volume buttons**
  For adjusting the speaker sound level.
- **MENU button**
  For displaying adjustment and setting screens.
- **ECO+QUIET button**
  For lowering the noise of the cooling fan and extending the lamp life.

Front View

- **Zoom knob**
  For enlarging/reducing the picture.
- **Tilt dial**
- **Height Adjustment button**
- **Adjustment foot**
  Push both sides of the lens cap to attach or remove.
- **Focus ring**
  For adjusting the focus.
- **Speaker**
- **Remote control sensor**
- **Height Adjustment button**
- **Adjustment foot**
- **Air filter/Intake vent**
  (on the bottom of the projector)

Attaching the lens cap

After putting the lens cap strap on the lens cap, pass the other end of the strap through the hole on the front side of the projector, next to the lens, as shown in the illustration.
**Projector (Rear View)**

### Terminals

- **COMPUTER/COMPONENT 2** input terminal: Terminal for Computer RGB and Component signals.
- **AUDIO input terminal** 23-25: Audio input terminal for COMPUTER/COMPONENT 1.
- **COMPUTER/COMPONENT 1** input terminal: Terminal for Computer RGB and Component signals.
- **S-VIDEO input terminal** 26: S-VIDEO input terminal.
- **VIDEO input terminal** 26: VIDEO input terminal.
- **AUDIO input terminal** for S-video 26: AUDIO input terminal for S-video.
- **AUDIO input terminal** for Video 26: AUDIO input terminal for Video.
- **MONITOR output terminal** 28: Output terminal for Computer RGB and Component signals. Shared for COMPUTER/COMPONENT 1 and 2.
- **AUDIO output terminal** 29: AUDIO output terminal.
- **LAN terminal** 28: Terminal for controlling the projector using a computer via network.
- **WIRED REMOTE terminal** 14: For connecting the remote control to the projector when the signals from the remote control cannot reach the remote control sensor.
- **RS-232C terminal** 27: Terminal for controlling the projector using a computer.
- **USB terminal** 39: Terminal connecting with the USB terminal on the computer for using the supplied remote control as the computer mouse.
- **COMPUTER/COMPONENT 1** input terminal: Terminal for Computer RGB and Component signals.
- **AUDIO input terminal** for Video 26: AUDIO input terminal for Video.
- **S-VIDEO input terminal** 26: S-VIDEO input terminal.
- **VIDEO input terminal** 26: VIDEO input terminal.
- **AUDIO input terminal** 26: AUDIO input terminal for Video.
- **MONITOR output terminal** 28: Output terminal for Computer RGB and Component signals. Shared for COMPUTER/COMPONENT 1 and 2.
- **REMOTE control sensor** 15: Remote control sensor.
- **Carrying handle**
- **Intake vent** 55: Intake vent.
- **Exhaust vent** 55: Exhaust vent.
- ***Kensington Security Standard connector**
- **AC socket** 30: AC socket. Connect the supplied power cord.

### Using the Carrying Handle

When transporting the projector, carry it by the carrying handle on the side.
- Always put on the lens cap to prevent damage to the lens when transporting the projector.
- Do not lift or carry the projector by the lens or the lens cap as this may damage the lens.

### Using the Kensington Lock

- This projector has a Kensington Security Standard connector for use with a Kensington MicroSaver Security System. Refer to the information that came with the system for instructions on how to use it to secure the projector.
Part Names and Functions

Remote Control

**STANDBY button**
- For putting the projector into standby mode.

**KEYSTONE button**
- For entering the Keystone Correction mode.

**ENTER button**
- For setting items selected or adjusted on the menu.

**L-CLICK button**
- For the Left click when with the USB connection (using a USB cable or the optional remote receiver).

**MAGNIFY (Enlarge/Reduce) buttons**
- For enlarging/reducing part of the image.

**PAGE Up/Down buttons**
- Same as the [Page Down] and [Page Up] keys on a computer keyboard, when with the USB connection (using a USB cable or the optional remote receiver).

**BREAK TIMER button**
- For displaying the break timer.

**AUTO SYNC button**
- For automatically adjusting images when connected to a computer.

**PICTURE MODE button**
- For switching the picture mode.

**INPUT buttons**
- For switching to the respective input modes.

**WIRED R/C JACK**
- For controlling the projector by connecting the remote control to the projector.

**ON button**
- For turning the power on.

**MENU button**
- For displaying adjustment and setting screens.

**MOUSE/Adjustment buttons (▲▼◄►) •**
- For moving the computer cursor when with the USB connection (using a USB cable or the optional remote receiver).
- For selecting and adjusting on-screen items.

**R-CLICK/RETURN button •**
- For the Right click when with the USB connection (using a USB cable or the optional remote receiver).
- For returning to the previous display.

**Volume buttons**
- For adjusting the speaker sound level.

**AV MUTE button**
- For temporarily displaying the black screen and turning off the sound.

**FREEZE button**
- For freezing images.

**RESIZE button**
- For switching the screen size (NORMAL, BORDER, etc.).

**ECO+QUIET button**
- For lowering the noise of the cooling fan and extending the lamp life.

Using the Remote Control with a Signal Cable

When the signals from the remote control cannot be reached due to the positioning of the projector, use a ø3.5 mm minijack cable to connect the remote control to the projector. Now you can control the projector with the remote control.

![Diagram of cable connection](image_url)

**Note**
- The wireless remote function is not possible when the ø3.5 mm minijack cable is connected to the projector. Should the wireless remote operation be required, the ø3.5 mm minijack cable should be disconnected from the projector.
## Using the Remote Control

### Usable Range

The remote control can be used to control the projector within the ranges shown in the illustration.

**Note**

- The signal from the remote control can be reflected off a screen for easy operation. However, the effective distance of the signal may differ depending on the screen material.

**When using the remote control:**

- Take care not to drop, expose to moisture or high temperature.
- The remote control may malfunction under a fluorescent lamp. In this case, move the projector away from the fluorescent lamp.

### Inserting the Batteries

1. **Pull down the tab on the cover and remove the cover towards the direction of the arrow.**

2. **Insert the included batteries.**
   - Insert the batteries making sure the polarities correctly match the and marks inside the battery compartment.

3. **Insert the lower tab of the cover into the opening, and lower the cover until it clicks in place.**

**Incorrect use of the batteries may cause them to leak or explode. Please follow the precautions below.**

**Caution**

- Danger of explosion if battery is incorrectly replaced. Replace only with alkaline or manganese batteries.
- Insert the batteries making sure the polarities correctly match the and marks inside the battery compartment.
- Batteries of different types have different properties, therefore do not mix batteries of different types.
- Do not mix new and old batteries. This may shorten the life of new batteries or may cause old batteries to leak.
- Remove the batteries from the remote control once they have run out, as leaving them in can cause them to leak. Battery fluid from leaked batteries is harmful to skin, therefore ensure you wipe them first and then remove them using a cloth.
- The batteries included with this projector may run down in a short period, depending on how they are kept. Be sure to replace them as soon as possible with new batteries.
- Remove the batteries from the remote control if you will not be using the remote control for a long time.
- Comply with the rules (ordinance) of each local government when disposing of worn-out batteries.
Quick Start

This section shows the basic operation (projector connecting with the computer). For details, see the page described below for each step.

**Setup and Projection**
In this section, connection of the projector and the computer is explained using one example.

1. **Place the projector facing a screen**

2. **Connect the projector to the computer and plug the power cord into the AC socket of the projector**

When connecting equipment other than the computer, see pages 25, 28 and 29.

3. **Remove the lens cap and turn the projector on**

On the projector: **STANDBY/ON**

On the remote control: **ON**

---

**Pages:** 18, 23, 30
4. Adjust the angle

Adjust the projector angle
- Adjust the projector angle using the Height Adjustment buttons.
- Rotate the Tilt dial to adjust the horizontal tilt of the projector.

This projector is equipped with an “Auto Keystone Correction” function that automatically corrects any trapezoidal distortion within the projected image.

5. Adjust the focus and the zoom

Bring the projected image into focus
- Bring the projected image into focus by rotating the focus ring.

Adjust the projected image size
- Adjust the projected image size by moving the zoom knob.

6. Select the INPUT mode

Select the “COMPUTER 1” using the INPUT buttons on the projector or the COMPUTER 1 button on the remote control.

On the projector On the remote control

INPUT list

- When you press the INPUT buttons on the projector, the INPUT list appears. Press ▲▼ to select an item on the list, and press ◄ to switch to the selected INPUT mode.

- When using the remote control, press ◄/►/◄/►/◄/► to switch the INPUT mode.

7. Turn the Power off

Press the STANDBY button, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

- Even if you unplug the power cord from the AC outlet, the cooling fan continues to run for a while.
Setting Up the Projector

For optimal image quality, position the projector perpendicular to the screen with the projector's feet flat and level. Doing so will eliminate the need for Keystone correction and provide the best image quality. (See page 32.)

Standard Setup (Front Projection)

■ Place the projector at the required distance from the screen according to the desired picture size. (For details, refer to the “SETUP MANUAL” contained on the supplied CD-ROM.)

Example of standard setup

Side View

Ceiling-mount Setup

■ It is recommended that you use the optional Sharp ceiling-mount adaptor and unit for this installation. Before mounting the projector, contact your nearest Sharp Authorized Projector Dealer or Service Center to obtain the recommended ceiling-mount adaptor and unit (sold separately).
**Projection (PRJ) Mode**

The projector can use any of the 4 projection modes, shown in the diagram below. Select the mode most appropriate for the projection setting in use. (You can set the PRJ mode in “Options2” menu. See page 52.)

- **Table mounted, front projection**  
  [Menu item ➞ “Front”]

- **Ceiling mounted, front projection**  
  [Menu item ➞ “Ceiling + Front”]

- **Table mounted, rear projection**  
  (with a translucent screen)  
  [Menu item ➞ “Rear”]

- **Ceiling mounted, rear projection**  
  (with a translucent screen)  
  [Menu item ➞ “Ceiling + Rear”]

**Indication of the Projection Image Size and Projection Distance**

For details, refer to the “SETUP MANUAL” contained on the supplied CD-ROM. Example: NORMAL Mode (4:3) for standard lens

---

**Diagram**

- **Picture Size**
  - 500”
  - 400”×300”
  - 320”×240”
  - 240”×180”
  - 160”×120”
  - 120”×90”
  - 80”×60”
  - 67”×50”
  - 48”×36”

- **Projection Distance**
  - 58’7”–70’4” (17.9 m – 21.4 m)
  - 23’5”–28’1” (7.1 m – 8.6 m)
  - 11’9”–14’1” (3.6 m – 4.3 m)
  - 7’0”–8’5” (2.1 m – 2.6 m)
Storing the Projector

How to Use the Storage Case

When storing the projector, attach the lens cap to the lens, and place it in the supplied storage case.

1 Open the cover of the storage case.

2 Place the projector into the storage case.

- Ensure the projector has cooled down sufficiently before placing it in the case.
- Ensure the lens cap is attached to the lens for protection.
- Place the projector into the storage case with the lens facing the handle.
- Ensure the projector is held in place by using the fixing band.

3 Close the cover of the storage case.

4 Place the accessories in the front pocket of the storage case.

Supplied accessories (Remote control, etc.)
Samples of Cables for Connection

For more details of connection and cables, refer to the operation manual of the connecting equipment. You may need other cables or connectors not listed below.

*Samples of Cables for Connection*
Connecting to a Computer

Before connecting, ensure the power cord of the projector from the AC outlet is unplugged, and that the devices to be connected are turned off. After making all connections, turn on the projector and then the other devices. When connecting a computer, ensure that it is the last device to be turned on after all the connections are made.

Ensure the operation manuals of the devices to be connected have been read before making connections.

When connecting with the RGB cable

(Connecting to COMPUTER/COMPONENT 1 or 2: The illustration shown below is for the former.)

* ø3.5 mm stereo or mono audio cable (commercially available or available as Sharp service part QC NWGA038WJPZ)

When using the ø3.5 mm mono audio cable, the volume level will be half of when using the ø3.5 mm stereo audio cable.

Note

• See page 63 “Computer Compatibility Chart” for a list of computer signals compatible with the projector. Use with computer signals other than those listed may cause some of the functions to not work.
• A Macintosh adaptor may be required for use with some Macintosh computers. Contact your nearest Macintosh Dealer.
• Depending on the computer you are using, an image may not be projected unless the computer’s external output port is switched on. (e.g. Press “Fn” and “F5” keys simultaneously when using a SHARP notebook computer). Refer to the specific instructions in your computer’s operation manual to enable your computer’s external output port.
Connecting to a Computer

When connecting with a DVI digital cable

The projector employs the DVI digital input terminal for direct input of Digital Video signals from a computer.

* When using the ø3.5 mm mono audio cable, the volume level will be half of when using the ø3.5 mm stereo audio cable.

* ø3.5 mm stereo or mono audio cable
  (commercially available or available as Sharp service part QCNWGA038WJPZ)
Connecting to Video Equipment

The image quality is highest in order of the Component signal, the RGB signal, the S-video signal and the Video signal. If your audio-visual equipment has a component output terminal or RGB output terminal, use the COMPUTER/COMPONENT terminal 1 or 2 on the projector for video connection.

When connecting video equipment with a DVI output terminal

When connecting video equipment with component video output terminal

(Connecting to COMPUTER/COMPONENT 1 or 2: The illustration shown below is for the former.)

Note

• Select the input signal type of the video equipment. See page 45.

Note

• When you connect video equipment with a 21-pin RGB output (Euro-scart) to the projector, use a commercially available cable that fits in the projector terminal you want to connect.
Connecting to Video Equipment

When connecting video equipment with S-video output terminal

When connecting video equipment with video output terminal

Note
• When you connect video equipment with a 21-pin RGB output (Euro-scart) to the projector, use a commercially available cable that fits in the projector terminal you want to connect.
Controlling the Projector by a Computer

When the RS-232C terminal on the projector is connected to a computer, the computer can be used to control the projector and check the status of the projector. Refer to the “SETUP MANUAL” contained on the supplied CD-ROM for “RS-232C Specifications and Commands”.

When connecting to a computer using an RS-232C serial control cable and a DIN-D-sub RS-232C adaptor

**Note**
- The RS-232C function may not operate if your computer terminal is not correctly set up. Refer to the operation manual of the computer for details.

**Info**
- Do not connect the RS-232C cable to a port other than the RS-232C terminal on the computer. This may damage your computer or projector.
- Do not connect or disconnect an RS-232C serial control cable to or from the computer while it is on. This may damage your computer.
Connecting to a Monitor with RGB Input Terminal

You can display computer images on both the projector and a separate monitor using two sets of RGB cables.

**Controlling the Projector by a Computer**

When connecting to the LAN terminal using a LAN cable

- To RGB input terminal
- RGB cable (commercially available)
- To RGB output terminal
- To COMPUTER/COMPONENT 1 input terminal
- To MONITOR OUT terminal

**Note**
- When connecting to hub, use straight-through Category 5 (CAT.5) type cable (commercially available).
- When connecting to computer, use cross-over Category 5 (CAT.5) type cable (commercially available).

* To ensure safety, do not connect the LAN terminal with any cables such as a telephone line that may cause excessive voltage.
Connecting to an Amplifier or Other Audio Equipment

Audio signals input from equipment connected to each audio input terminal of the projector can be output to audio equipment.

**Note**
- Turn off the power of both the projector and audio equipment when connecting.
- When turning off the power in the case of connecting an amplifier or other audio equipment, first turn off the power of the amplifier and then turn off the power of the projector.
- By using external audio components, the volume can be amplified for better sound.
- For details on Variable Audio Output (VAO) and Fixed Audio Output (FAO), see page 52.
Connecting the Power Cord
Plug the supplied power cord into the AC socket on the rear of the projector. Then plug into the AC outlet.

Turning the Projector On
Before performing the steps in this section, connect any equipment that you use with the projector. (See pages 23-29.)

Remove the lens cap and press STANDBY/ON on the projector or ON on the remote control.
• The power indicator illuminates green.
• After the lamp indicator illuminates, the projector is ready to start operation.
• When System Lock is set, the keycode input screen appears. Enter the right keycode to start projection. See page 49 for details.

Note
• The lamp indicator illuminates or blinks, indicating the status of the lamp.
  Green: The lamp is on.
  Blinking green: The lamp is warming up.
  Red: The lamp is shut down abnormally or the lamp should be replaced.
• When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp’s control circuitry is stabilizing the lamp output characteristics. This does not indicate malfunction.
• If the projector is put into standby mode and immediately turned on again, the lamp may take some time to illuminate.

Turning the Power Off (Putting the Projector into Standby Mode)

1 Press STANDBY/ON on the projector or STANDBY on the remote control, then press that button again while the confirmation message is displayed, to put the projector into standby mode.

Info
• When “Auto Restart” is set to “On”: If the power cord is unplugged from the outlet or the breaker switch is turned off when the projector is on, then the projector automatically turns on when the power cord is plugged into the AC outlet or the breaker switch is turned on. (See page 50.)
• English is the factory preset language. If you want to change the on-screen display to another language, change the language according to the procedure on page 54.

Note
• The lamp indicator illuminates or blinks, indicating the status of the lamp.
  Green: The lamp is on.
  Blinking green: The lamp is warming up.
  Red: The lamp is shut down abnormally or the lamp should be replaced.
• When switching on the projector, a slight flickering of the image may be experienced within the first minute after the lamp has been illuminated. This is normal operation as the lamp’s control circuitry is stabilizing the lamp output characteristics. This does not indicate malfunction.
• If the projector is put into standby mode and immediately turned on again, the lamp may take some time to illuminate.

Info
• Direct Power Off function: You can unplug the power cord from the AC outlet even if the cooling fan is still running.
• Even if you unplug the power cord from the projector, the cooling fan continues to run for a while.
Using the Adjustment Feet

The height of the projector can be adjusted using the adjustment feet when the screen is located higher than the projector, the screen is inclined or when the installation site is slightly inclined. Install the projector so that it is as perpendicular to the screen as possible.

1. **Press the Height Adjustment buttons.**
   - The adjustment feet come out.

2. **Lift the projector to adjust its height and remove your hands from the Height Adjustment buttons.**
   - The projector is adjustable up to approximately 9 degrees.

3. **Rotate the Tilt dial to finely adjust the horizontal tilt of the projector.**
   - The inclination is adjustable within approximately 2 degrees.
   - When adjusting the height of the projector, trapezoidal distortion occurs. When “Auto Keystone” of the “Options1” menu is set to “On” (see page 48), keystone correction functions automatically to correct trapezoidal distortion. When you want to adjust the automatically corrected image, use the manual keystone correction. (See page 32.)

**Info**
- Do not press the Height Adjustment button when the adjustment feet come out without firmly holding the projector.
- Do not hold the lens when lifting or lowering the projector.
- When lowering the projector, be careful not to get your fingers caught in the area between the adjustment foot and the projector.
Correcting Trapezoidal Distortion

Auto Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

This projector is equipped with an “Auto Keystone Correction” function that automatically corrects any trapezoidal distortion within the projected image. The correction is made automatically provided the vertical incline or decline is within ±12 degrees.

Note

• When not using the Auto Keystone Correction function, set “Auto Keystone” on the “Options1” menu to “Off”.

Manual Keystone Correction

When you want to make fine adjustments after the Auto Keystone Correction function has been activated, or when you want to make corrections without using the Auto Keystone Correction function, you can make corrections manually using the following procedure.

1 Press KEYSTONE on the remote control to enter the Keystone Correction mode.
   • You can also use KEYSTONE on the projector.

2 Press ▲, ▼ or ◄, ▶ on the remote control to adjust the Keystone Correction.
   • You can also adjust the Keystone Correction using the ▲, ▼ or ◄, ▶ buttons on the projector.

Note

• Press RETURN to return to the default setting.
• Straight lines or the edges of images may appear jagged while adjusting the image.

3 Press KEYSTONE.
   • The on-screen display of the Keystone Correction mode will disappear.
   • You can also use KEYSTONE on the projector.

Note

• The Manual Keystone Correction can be adjusted up to an angle of approximately ±40 degrees and the screen can also be set up to an angle of approximately ±40 degrees (when the resize mode is set to “Normal” (see page 47)).
Adjusting the Lens

The image is focused and adjusted to the screen size using the focus ring or zoom knob on the projector.

1 The focus is adjusted by rotating the focus ring.

2 Zooming is adjusted by moving the zoom knob.
Switching the INPUT Mode

Select the appropriate input mode for the connected equipment.

On the remote control
Press \( \text{INPUT Mode} \), \( \text{INPUT Mode} \), \( \text{INPUT Mode} \), \( \text{INPUT Mode} \) or \( \text{INPUT Mode} \) on the remote control to select the input mode.

On the projector

1. Press an INPUT (\( \text{INPUT Mode} \)) button.
   - The INPUT list appears.
2. Press \( \text{INPUT Mode} \) to select an item on the list.
3. Press \( \text{ENTER} \).

Note
• When no signal is received, “NO SIGNAL” will be displayed. When a signal that the projector is not preset to receive is received, “NOT REG.” will be displayed.

Note
- Pressing \( \text{VOL} \) will lower the volume.
- Pressing \( \text{VOL} \) will raise the volume.

Displaying the Black Screen and Turning Off the Sound Temporarily
Press \( \text{AV MUTE} \) on the remote control to temporarily display a black screen and turn off the sound.

On-screen Display

```
AV MUTE
```

Note
- Pressing \( \text{AV MUTE} \) again will turn the projected image and sound back on.

Displaying an Enlarged Portion of an Image
Graphs, tables and other portions of projected images can be enlarged. This is helpful when providing more detailed explanations.

1. Press \( \text{MAGNIFY} \) on the remote control.
   - Enlarges the image.
   - Pressing \( \text{MAGNIFY} \) or \( \text{MAGNIFY} \) enlarges or reduces the projected image.

   Note
   - You can change the location of the enlarged image using \( \text{Up/Down/Left/Right} \).

2. Press \( \text{RETURN} \) on the remote control to cancel the operation.
   - The magnification then returns to \( \times 1 \).

   Note
   - In the following cases, the image will return to the normal size (\( \times 1 \)).
     - When switching the INPUT mode.
     - When \( \text{RETURN} \) has been pressed.
     - When the input signal is changed.
     - When the input signal resolution and refresh rate (vertical frequency) change.
     - When \( \text{RESIZE} \) has been pressed.

Freezing an Image

1. Press \( \text{FREEZE} \) on the remote control.
   - The projected image is frozen.

2. Press \( \text{FREEZE} \) again to return to the image from the currently connected equipment.
Displaying and Setting the Break Timer

This function allows you to show the remaining time for break during meeting.

1. Press \( \text{BREAK TIMER} \). The break timer starts to count down from 5 minutes.

   **On-screen Display**

   \( 4:50 \)

2. When “\( \text{○} \)” is displayed, press \( \text{△}, \text{▼}, \text{◄} \) or \( \text{►} \) to set the break timer.
   • You can set anywhere between 1 and 60 minutes (in 1 minute units).

3. Press \( \text{BREAK TIMER} \) to cancel the break timer.

Switching the Eco+Quiet Mode

Press \( \text{ECO+QUIET} \) on the remote control or \( \text{ECO+QUIET} \) on the projector to switch the Eco+Quiet mode between on and off.

• When the Eco+Quiet Mode is set to “On”, the sound of the cooling fan will turn down, the power consumption will decrease, and the lamp life will extend.

**Note**

• Refer to “Eco+Quiet Mode Setting” on page 48 for details.

Selecting the Picture Mode

You can select the suitable picture mode for the projected image, such as movie or video game.

Press \( \text{PICTURE MODE} \) on the remote control.

• When pressing \( \text{PICTURE MODE} \), the picture mode changes in order of:

  \[ \text{STANDARD} \rightarrow \text{PRESENTATION} \rightarrow \text{MOVIE} \rightarrow \text{GAME} \rightarrow \text{sRGB} \]

**Note**

• “\( \text{sRGB} \)” is displayed only when RGB signal is input.
• Press \( \text{RETURN} \) to return to the “STANDARD” mode while “Picture Mode” is displayed on the screen.
Resize Mode

This function allows you to modify or customize the resize mode to enhance the input image. Depending on the input signal, you can choose a desired image.

- **Image Projection**

---

: Cutout area on which images cannot be projected

: Area on which the image is not included in the original signals

*The Image Shift function can be used for these images.*
Using the Remote Control as the Wireless Computer Mouse

When connecting the projector and the computer with a USB cable, you can use the remote control as the computer mouse.

If the computer is placed too far away from the projector to be connected via the USB cable, the separately sold remote receiver (AN-MR2) makes it possible to operate the projector with the remote control. For details, see the operation manual of the receiver.

Connecting with a USB cable

The mouse pointer can be operated in the following way after it is connected.

- **When moving the cursor**
  Press MOUSE/Adjustment buttons (▲/▼/◀▶).

- **When left-clicking**
  Press L-CLICK.

- **When right-clicking**
  Press R-CLICK.

- **When your computer supports only a one-click mouse (such as Macintosh)**
  Press L-CLICK or R-CLICK.
  L-CLICK and R-CLICK have common function.

- **When using [Page Up] or [Page Down]**
  Same as the [Page Up] and [Page Down] keys on a computer keyboard.
  Press PAGE or PAGE.

**Note**

- This function only works with the Microsoft® Windows® OS and Mac OS®. However, this function does not work with the following operation systems that do not support USB.
  - Versions earlier than Windows® 95
  - Versions earlier than Windows® NT4.0
  - Versions earlier than Mac OS® 8.5
  - You cannot use this function when displaying the menu screen.
  - Confirm that the computer recognizes the USB connection.
  - If “Resize” is displayed when signals having a higher resolution than XGA are being input and you have set “Dot By Dot” as the screen size, you cannot operate the mouse function.
Menu Items

The following shows the items that can be set in the projector.

Using the Menu Screen

Menu Selections

Example: Adjusting “Bright”  
• This operation can also be performed by using the buttons on the projector.

1 Press MENU.  
• The “Picture” menu screen for the selected input mode is displayed.

2 Press ► or ◄ to display the other menu screens.  
• The menu icon for the selected menu screen is highlighted.

<table>
<thead>
<tr>
<th>Menu icon</th>
<th>Menu screen</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Picture</td>
</tr>
<tr>
<td></td>
<td>Fine Sync</td>
</tr>
<tr>
<td>Options1</td>
<td>Options2</td>
</tr>
<tr>
<td>Language</td>
<td></td>
</tr>
</tbody>
</table>

Note  
• The “Fine Sync” menu is not available for selecting VIDEO or S-VIDEO.

Example: “Picture” screen menu for COMPUTER/COMPONENT 1 (RGB) mode

Menu icons
3 Press ▲ or ▼ to select the item you want to adjust.
• The selected item is highlighted.

To adjust the projected image while viewing it

Press ◄ENTER.  
• The selected single adjustment item (e.g. "Bright") appears instead of the menu.
• When pressing ▲ or ▼, the following item ("Red" after "Bright") will be displayed.

Note
• Press ◄RETURN to return to the previous screen.

4 Press ◄ or ► to adjust the item selected.
• The adjustment is stored.
• For some menu items, press ► to display its submenu and press ▲ or ▼ to select an adjustment item, and then press ◄ENTER.

5 Press ◄MENU.  
• The menu screen will disappear.
Selecting the Picture Mode

This function allows you to select the picture mode in accordance with brightness of the room or content of the image to be projected. In all picture modes, items on the “Picture” menu can be adjusted and saved.

### Selectable items
- **Standard**: For standard image
- **Presentation**: Brightens portions of image for more enhanced presentations.
- **Movie**: Gives natural tint to the projected image.
- **Game**: Gives sharpness to the projected image.
- **sRGB**: For high fidelity reproduction of images from a computer.

### Note
- You can also press PICTURE MODE on the remote control to select the picture mode. (See page 36.)
- “sRGB” is displayed only when RGB signal is input.
- sRGB is an international standard of color reproduction regulated by the IEC (International Electrotechnical Commission). As the fixed color area has been decided by the IEC, the images are displayed in a natural tint based on an original image, when “sRGB” is selected. For additional information about the sRGB function, visit “http://www.srgb.com/”. You cannot set the items “Red”, “Blue”, “CLR Temp”, when “sRGB” is selected.

### Info
- When “sRGB” is selected, the projected image may become dark, but this does not indicate a malfunction.

### Adjusting the Image

Select a picture mode before adjusting the image.

**Selectable items**
- **Contrast**: For less contrast
- **Bright**: For less brightness
- **Color**
- **Tint**
- **Sharp**
- **Red**
- **Blue**

**Press ↓**
- **For less contrast**
- **For less brightness**
- **For less color intensity**
- **For making skin tones purplish**
- **For less sharpness**
- **For weaker red**
- **For weaker blue**

**Press ↑**
- **For more contrast**
- **For more brightness**
- **For more color intensity**
- **For making skin tones greenish**
- **For more sharpness**
- **For stronger red**
- **For stronger blue**

1. “Color”, “Tint” and “Sharp” are not displayed when inputting the signal through COMPUTER/COMPONENT 1 (RGB), 2 (RGB) or DVI-D.
2. “Red” and “Blue” cannot be adjusted when “sRGB” is selected.

### Note
- “Sharp” can be adjusted when 480I, 480P, 540P, 576I, 576P, 720P, 1035I or 1080I signals are detected.
- To reset all adjustment items, select “Reset” and press ENTER.
### Adjusting the Color Temperature

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5500K</td>
<td>For lower color temperature for warmer, reddish incandescent-like images.</td>
</tr>
<tr>
<td>6500K</td>
<td></td>
</tr>
<tr>
<td>7500K</td>
<td></td>
</tr>
<tr>
<td>8500K</td>
<td></td>
</tr>
<tr>
<td>9300K</td>
<td>For higher color temperature for cooler, bluish, fluorescent-like images.</td>
</tr>
<tr>
<td>10500K</td>
<td></td>
</tr>
</tbody>
</table>

**Note**
- Values on “CLR Temp” are only for general standard purposes.
- “CLR Temp” cannot be set when “sRGB” is selected.

### Signal Type Setting

This function allows you to select the input signal type RGB or Component for COMPUTER/COMPONENT 1, 2 or DVI-D.

#### COMPUTER/COMPONENT 1, 2

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Input signals are automatically recognized as RGB or component.</td>
</tr>
<tr>
<td>RGB</td>
<td>Set when RGB signals are received.</td>
</tr>
<tr>
<td>Component</td>
<td>Set when Component signals are received.</td>
</tr>
</tbody>
</table>

#### DVI-D

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D. PC RGB</td>
<td>Set when Digital PC RGB signals are received from a computer.</td>
</tr>
<tr>
<td>D. PC Comp.</td>
<td>Set when Digital PC Component signals are received from a computer.</td>
</tr>
<tr>
<td>D. Video RGB</td>
<td>Set when Digital Video RGB signals are received from video equipment.</td>
</tr>
<tr>
<td>D. Video Comp.</td>
<td>Set when Digital Video Component signals are received from video equipment.</td>
</tr>
</tbody>
</table>

### Selecting the Dynamic Range

An optimum picture may not be displayed if a DVI-D-capable device’s output signal type and the projector’s input signal type do not match. If this should occur, switch “Dynamic Range”.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard</td>
<td>When the black levels of the image show banding or appear faded, select the item that results in the best picture quality. (In most circumstances, “Standard” should be selected.)</td>
</tr>
<tr>
<td>Enhanced</td>
<td></td>
</tr>
</tbody>
</table>

**Note**
- The Dynamic Range can be selected only when “DVI-D” input mode is selected.

### Selecting the Progressive Mode

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>2D Progressive</td>
<td>Useful to display fast-moving images such as sports and action films.</td>
</tr>
<tr>
<td>3D Progressive</td>
<td>Useful to display relatively slow-moving images such as drama and documentary more clearly.</td>
</tr>
</tbody>
</table>

**Note**
- When the image is blurred or noisy, switch to the optimal mode.
- When using progressive inputs, inputs are directly displayed so that “2D Progressive” and “3D Progressive” cannot be selected.

### Setting the Video System

The video input system mode is factory preset to “Auto”; however, a clear picture from the connected audio-visual equipment may not be received, depending on the Video signal difference. In that case, switch the Video signal.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td></td>
</tr>
<tr>
<td>PAL</td>
<td></td>
</tr>
<tr>
<td>SECAM</td>
<td></td>
</tr>
<tr>
<td>NTSC4.43</td>
<td></td>
</tr>
<tr>
<td>NTSC3.58</td>
<td></td>
</tr>
<tr>
<td>PAL-M</td>
<td></td>
</tr>
<tr>
<td>PAL-N</td>
<td></td>
</tr>
<tr>
<td>PAL -60</td>
<td></td>
</tr>
</tbody>
</table>

* When reproducing NTSC signals in PAL video equipment.

**Note**
- The Video signal can only be set in VIDEO or S-VIDEO mode.
- When “Video System” is set to “Auto”, you may not receive a clear picture due to signal differences. Should this occur, switch to the video system of the source signal.
Computer Image Adjustment ("Fine Sync" menu)

Adjusting the Computer Image

If the optimum image cannot be obtained with Auto Sync adjustment, use the Fine Sync function.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clock</td>
<td>Adjusts vertical noise.</td>
</tr>
<tr>
<td>Phase</td>
<td>Adjusts horizontal noise (similar to tracking on your VCR).</td>
</tr>
<tr>
<td>H-Pos</td>
<td>Centers the on-screen image by moving it to the left or right.</td>
</tr>
<tr>
<td>V-Pos</td>
<td>Centers the on-screen image by moving it up or down.</td>
</tr>
</tbody>
</table>

Note

- To reset all adjustment items, select "Reset" and press ENTER.
- The adjustable range of "V-Pos" (V-Position) may vary depending on the screen resolution of the computer.

Resolution Setting

Ordinarily, the type of input signal is detected and the correct resolution mode is automatically selected. However, for some signals, the optimal resolution mode in "Resolution" on the "Fine Sync" menu may need to be selected to match the computer display mode.

Note

- If your computer displays patterns which repeat every other line (horizontal stripes), flickering may occur which makes the image hard to see.
- See "Checking the Input Signal" on the right column for information on the currently selected input signal.

Auto Sync Adjustment

Used to automatically adjust a computer image.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Auto Sync adjustment will occur when the projector is turned on or when the input signals are switched, when connected to a computer.</td>
</tr>
<tr>
<td>Off</td>
<td>Auto Sync adjustment is not automatically performed.</td>
</tr>
</tbody>
</table>

Note

- Auto Sync adjustment is also performed by pressing AUTO SYNC on the projector or AUTO SYNC on the remote control.
- The Auto Sync adjustment may take some time to complete, depending on the image of the computer connected to the projector.

Checking the Input Signal

This function allows you to check the current input signal information.

Note

- If your computer displays patterns which repeat every other line (horizontal stripes), flickering may occur which makes the image hard to see.
Using the “Options1” Menu

Checking the Lamp Life Status

You can confirm the cumulative lamp usage time and the remaining lamp life (percentage).

<table>
<thead>
<tr>
<th>Lamp usage condition</th>
<th>Remaining lamp life</th>
</tr>
</thead>
<tbody>
<tr>
<td>“Life”</td>
<td>100% 5%</td>
</tr>
<tr>
<td>Operated exclusively while “Eco+Quiet Mode” is “On”.</td>
<td>Approx. 3,000 hours Approx. 150 hours</td>
</tr>
<tr>
<td>Operated exclusively while “Eco+Quiet Mode” is “Off”.</td>
<td>Approx. 2,000 hours Approx. 100 hours</td>
</tr>
</tbody>
</table>

Note

- It is recommended that the lamp be changed when the remaining lamp life becomes 5%.
- Remaining lamp life changes within the range of the values shown depending on the frequency at which “Eco+Quiet Mode” is switched to “On” and “Off”. (See page 48.)
- The lamp life may vary depending on the usage condition.

Setting the Resize Mode

Note

- For details of the Resize mode, see pages 37 and 38.
- You can also press RESIZE on the remote control to set the resize mode. (See page 37.)

Adjusting the Image Position

You can move the projected image vertically.

Note

- This function only works in some RESIZE modes. (See pages 37 and 38.)
- To reset this function, select “0”.
- When adjusting the image shift, “Keystone” is set to “0” and “Auto Keystone” is set to “Off”.
# Using the “Options1” Menu

## 4 Keystone Correction

When the image is projected either from the top or from the bottom towards the screen at an angle, the image becomes distorted trapezoidally. The function for correcting trapezoidal distortion is called Keystone Correction.

- **Auto Keystone Correction**
  - Set “Auto Keystone” on the “Options1” screen menu to “On”.

- **Manual Keystone Correction**
  - Set “Auto Keystone” on the “Options1” screen menu to “Off”, and select “Keystone”, then adjust with the slide bar.

### Manual Correction

![button](image)

### Note
- The Keystone Correction can be adjusted up to an angle of approximately ±12 degrees with the “Auto Keystone” and up to an angle of approximately ±40 degrees with the manual “Keystone”.
- When “Resize” is set to “Normal”
- When the screen is slanting or the image is deteriorated, set “Auto Keystone” to “Off”.
- When adjusting the keystone or when “Auto Keystone” is set to “On”, “Image Shift” is automatically set to “0”.

---

## 5 Setting On-screen Display

This function allows you to turn the on-screen messages on or off.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>All On-screen Displays are displayed.</td>
</tr>
</tbody>
</table>
| Off              | - INPUT mode/VOLUME/AV MUTE/FREEZE/AUTO SYNC/MAGNIFY/ “An invalid button has been pressed.” are not displayed.  
- “All buttons on Projector are locked.” is displayed when STANDBY/ON is pressed while the Keylock function is active. |

---

## 6 Selecting a Startup and Background Image

### Selectable items

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Approx. 80%</td>
<td>Low</td>
<td>Approx. 3,000 hours</td>
</tr>
<tr>
<td>Off</td>
<td>100%</td>
<td>Normal</td>
<td>Approx. 2,000 hours</td>
</tr>
</tbody>
</table>

### Note
- You can also use ECO+QUIET button on the remote control or on the projector to switch the Eco+Quiet Mode. (See page 36.)

---

## 8 Auto Power Off Function

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>The projector automatically enters the standby mode when no input signal is detected for 15 minutes or longer.</td>
</tr>
<tr>
<td>Off</td>
<td>The Auto Power Off function will be disabled.</td>
</tr>
</tbody>
</table>

### Note
- When the Auto Power Off function is set to “On”, 5 minutes before the projector enters the standby mode, the message “Enter STANDBY mode in X min.” will appear on the screen to indicate the remaining minutes.
### Setting the System Sound

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>A confirmation sound is made when the projector turns on/off.</td>
</tr>
<tr>
<td>Off</td>
<td>No confirmation sound is made.</td>
</tr>
</tbody>
</table>

### Selecting the Menu Screen Position

Select “Menu Position” on the “Options1” menu and the desired position for the menu screen.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Center</td>
<td>Displayed on the center of the image.</td>
</tr>
<tr>
<td>Upper Right</td>
<td>Displayed on the upper right of the image.</td>
</tr>
<tr>
<td>Lower Right</td>
<td>Displayed on the lower right of the image.</td>
</tr>
<tr>
<td>Upper Left</td>
<td>Displayed on the upper left of the image.</td>
</tr>
<tr>
<td>Lower Left</td>
<td>Displayed on the lower left of the image.</td>
</tr>
</tbody>
</table>

### System Lock Function

This function prevents unauthorized use of the projector. Once this function is activated, users must enter the correct keycode each time the projector is turned on. We suggest you record the keycode in a safe place where only authorized users have access.

**Info**

- If you lose or forget your keycode, contact your nearest Sharp Authorized Projector Dealer or Service Center (see page 66). Even if the product warranty is valid, the keycode reset will incur a charge.

### Setting/Changing the keycode

1. Select “System Lock” on the “Options1” menu, then press ▶.
   - A message is displayed.
   - Read this message, and press ENTER.
   - The screen for entering the keycode appears.

2. Press the 4 buttons on the remote control or on the projector to enter the preset keycode in “Old Code”.
   - When setting the keycode for the first time, press ▼ on the projector for four times.

3. Press the 4 buttons on the remote control or on the projector to enter the new keycode in “New Code”.

   **Note**
   - You cannot use the following buttons for keycode:
     - STANDBY/ON button
     - ON button
     - STANDBY button
     - ENTER button
     - L-CLICK button
     - R-CLICK/RETURN button
     - MENU button
     - ECO+QUIET button
     - BREAK TIMER button
   - System lock function recognizes each button on the remote control or on the projector as an individual button, even if they share the same button name. If you used the buttons on the projector in setting your keycode, the keycode cannot be canceled with the remote control.

4. Enter the same keycode in “Reconfirm”.

   **Note**
   - To cancel the keycode that you have already set
     - Press ▼ on the projector for four times in steps 3 and 4 above.
When System Lock is set

When System Lock is set, the keycode input screen appears after the power is turned on. When it appears, enter the right keycode to start projection. Failure to enter the keycode will cause images not to be projected even when signals are entered to the projector.

Note

• If no keycode is entered, the image will not be displayed, even if the projector receives the input signal.

Auto Restart Function

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>If the power cord is unplugged from the outlet or the breaker switch is turned off when the projector is on, then the projector automatically turns on when the power cord is plugged into the AC outlet or the breaker switch is turned on.</td>
</tr>
<tr>
<td>Off</td>
<td>The projector does not turn on automatically when the power cord is plugged into the AC outlet or the breaker switch is turned on.</td>
</tr>
</tbody>
</table>

Locking the Operation Buttons on the Projector (Keylock Function)

Use this function to lock the operation buttons on the projector.

■ Locking the Operation Buttons
Hold down ENTER on the projector for about 5 seconds while the projector is being turned on.

On-screen Display

Keylock function ON

• The keylock function does not affect the operation with the remote control buttons.
• You cannot use the keylock function while the projector is warming up.

■ Taking the Keylock Off
Hold down ENTER on the projector for about 5 seconds.

On-screen Display

Keylock function OFF

• When the projector is in standby mode, you can release the keylock by holding down ENTER and STANDBY/ON on the projector simultaneously for about 5 seconds.

Info

• You can activate the keylock function only when no on-screen display is shown.
**Helpful Functions Set during Installation (“Options2” menu)**

**Setting a Password**

If you do not want others to change the setting for the “Options2” menu, set a password.

1. **Select “Password”, then press ENTER.**
   - The screen for entering the password is displayed.

   ![Password Menu](image)

2. **Press ▲ or ▼ to set the first digit in “New Password” and then press ENTER.**

3. **Enter the remaining 3 digits and press ENTER.**

4. **Enter the same password again in “Reconfirm” and press ENTER.**

**Note**
- Once the password is set, you must enter the password to change the “Options2” menu settings.

**Changing the Password**

1. **Select “Password”, then press ENTER.**
   - The screen for entering the password appears.

2. **Enter the password in “Old Password” using ▲, ▼, ► and◄, then press ENTER.**

3. **Enter the password in “New Password” using ▲, ▼, ► and◄, then press ENTER.**

4. **Enter the same password again in “Reconfirm” using ▲, ▼, ► and◄, then press ENTER.**

**Note**
- If you do not need the password protection for the “Options2” menu settings anymore, press ENTER without entering a new password in steps 3 and 4.
- To cancel the password settings, press RETURN.

**If You Forget Your Password**

If you forget the password, perform the following procedure to delete it, then set a new password.

On the projector, press:

![Password Menu](image)

**Note**
- If ENTER is held down for more than 5 seconds, the operation buttons on the projector will be locked. (See page 50.)
- You cannot use the buttons on the remote control to delete the password.
Helpful Functions Set during Installation (“Options2” menu)

② Speaker Setting
This function allows you to set the audio output of the internal speaker to “On” or “Off” such as when the projector is connected to an external amplifier.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>The audio signal is output from the internal speaker.</td>
</tr>
<tr>
<td>Off</td>
<td>The audio signal is not output from the internal speaker.</td>
</tr>
</tbody>
</table>

③ Audio Output Type Setting
This function determines whether the audio level output from the AUDIO output (MONITOR output) terminal is fixed or variable by linking with VOLUME.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>FAO (Fixed Audio Output)</td>
<td>Audio output that does not vary in strength with the volume level of the source projector.</td>
</tr>
<tr>
<td>VAO (Variable Audio Output)</td>
<td>Audio output that varies in strength with the volume level of the source projector.</td>
</tr>
</tbody>
</table>

Info
- When “Audio Out” has been set to “VAO”, first make sure to lower the volume of the projector before turning the power on or off and when switching the input.

④ Reversing/Inverting Projected Images
This projector is equipped with a reverse/invert image function that allows you to reverse or invert the projected image for various applications.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Front</td>
<td>Normal image (Projected from the front of the screen)</td>
</tr>
<tr>
<td>Ceiling + Front</td>
<td>Inverted image (Projected from the front of the screen with an inverted projector)</td>
</tr>
<tr>
<td>Rear</td>
<td>Reversed image (Projected from the rear of the screen or with a mirror)</td>
</tr>
<tr>
<td>Ceiling + Rear</td>
<td>Reversed and inverted image (Projected with a mirror)</td>
</tr>
</tbody>
</table>

Note
- This function is used for the reversed image and ceiling-mount setups. (See page 19.)

⑤ Fan Mode Setting
This function changes the fan rotation speed.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Suitable for normal environments.</td>
</tr>
<tr>
<td>High</td>
<td>Select this when using the projector at altitudes of approximately 1,500 meters (4,900 feet) or more.</td>
</tr>
</tbody>
</table>

When “Fan Mode” is set to “High”, the fan rotation speeds up, and the fan noise becomes louder.

⑥ Monitor Output

⑦ LAN/RS232C
When set to “Enable”, the function is activated and power is consumed even in the standby mode. It is recommended that the function be set to “Disable” when it is not connected. This reduces power consumption when the projector is in the standby mode.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enable</td>
<td>The function is activated even if the projector is in standby mode.</td>
</tr>
<tr>
<td>Disable</td>
<td>The function is switched off when the projector is in standby mode.</td>
</tr>
</tbody>
</table>

Note
- When you want to control the projector using the LAN/RS232C function, select “Enable”.

⑧ Selecting the Transmission Speed (RS-232C)
Make sure that both the projector and computer are set for the same baud rate.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>9600 bps</td>
<td>Transmission speed is slow.</td>
</tr>
<tr>
<td>38400 bps</td>
<td>Transmission speed is rapid.</td>
</tr>
</tbody>
</table>

Note
- Refer to the “SETUP MANUAL” contained on the supplied CD-ROM for RS-232C Specifications and Command Settings.
- Refer to the computer’s operation manual for instructions for setting the computer’s baud rate.
### DHCP Client Setting

Connect the LAN cable before turning the projector on. If not, the DHCP Client function does not work.

<table>
<thead>
<tr>
<th>Selectable items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On</strong></td>
<td>Obtains configuration parameters for TCP/IP network automatically.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>Sets the TCP/IP manually.</td>
</tr>
</tbody>
</table>

Select “On” for “DHCP Client”, then press ENTER. “Obtaining IP Address...” appears, then the menu screen appears. Confirm the parameters of IP Address, Subnet Mask and Gateway on the TCP/IP screen.

If the DHCP server is not available, “Could not obtain IP Address.” appears. In this case, set the TCP/IP manually. (See the item 10.)

### TCP/IP Setting

Set the TCP/IP manually.

**1** Select “Off” for “DHCP Client”, then press ENTER.

**2** Select “TCP/IP”, then press ENTER.

**3** Enter “IP Address” using ▲, ▼, ► and ◄, then press ENTER.

<table>
<thead>
<tr>
<th>TCP/IP</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>IP Address</strong></td>
</tr>
<tr>
<td><strong>Subnet Mask</strong></td>
</tr>
<tr>
<td><strong>Gateway</strong></td>
</tr>
</tbody>
</table>

**4** Enter “Subnet Mask” using ▲, ▼, ► and ◄, then press ENTER.

**5** Enter “Gateway” using ▲, ▼, ► and ◄, then press ENTER.

**Note**

- Confirm the existing network’s segment (IP address group) to avoid setting an IP address that duplicates the IP addresses of other network equipment or computers. If “192.168.150.002” is not used in a network with an IP address of “192.168.150.XXX”, you don’t have to change the projector IP address.

- For details about each setting, consult your network administrator.
### Confirming the Network Information for the Projector

You can confirm the MAC address and projector name.

<table>
<thead>
<tr>
<th>Displayed items</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAC Address</td>
<td>The MAC address of the projector is displayed.</td>
</tr>
<tr>
<td>Projector</td>
<td>The projector name is displayed.</td>
</tr>
</tbody>
</table>

**Note**
- For information on how to change the projector name, see “SETUP MANUAL” contained in the supplied CD-ROM.

### Returning to the Default Settings

This function allows you to initialize the settings you have made in the projector.

**Note**
- The following items or menu cannot be initialized.
  - “Fine Sync” menu
  - Resolution
  - “Options1” menu
  - Lamp Timer (Life)
  - System Lock
  - “Language” menu

### Selecting the On-screen Display Language

The projector can switch the on-screen display language among 15 languages.
Cleaning the projector

- Ensure the power cord is unplugged before cleaning the projector.
- The cabinet as well as the operation panel is made of plastic. Avoid using benzene or thinner, as these can damage the finish on the cabinet.
- Do not use volatile agents such as insecticides on the projector.
  Do not attach rubber or plastic items to the projector for long periods.
  The effects of some of the agents in the plastic may cause damage to the quality or finish of the projector.

- Wipe off dirt gently with a soft flannel cloth.
- When the dirt is hard to remove, soak a cloth in a mild detergent diluted with water, wring the cloth well and then wipe the projector.
  Strong cleaning detergents may discolor, warp or damage the coating on the projector. Make sure to test on a small, inconspicuous area on the projector before use.

Cleaning the lens

- Use a commercially available blower or lens cleaning paper (for glasses and camera lenses) for cleaning the lens. Do not use any liquid type cleaning agents, as they may wear off the coating film on the surface of the lens.
- As the surface of the lens can easily get damaged, be careful not to scrape or hit the lens.

Cleaning the exhaust and intake vents

- Use a vacuum cleaner to clean dust from the exhaust vent and the intake vent.

Info

- If you want to clean the air vents during projector operation, ensure you press STANDBY/ON on the projector or STANDBY on the remote control and put the projector into standby mode. After the cooling fan has stopped, unplug the power cord from the AC socket and clean the vents.
- The air filters should be cleaned every 100 hours of use. Clean the filters more often when the projector is used in a dusty or smoky location.
Replacing the Air Filter

- This projector is equipped with air filters to ensure the optimal operating condition of the projector.
- Ask your nearest Sharp Authorized Projector Dealer or Service Center to exchange the filter (PFILDA022WJKZ) when it is no longer possible to clean.

Replacing the Air Filter

1. Press \textcircled{STANDBY/ON} on the projector or \textcircled{STANDBY} on the remote control to put the projector into the standby mode.
   - Wait until the cooling fan stops.

2. Disconnect the power cord.
   - Unplug the power cord from the AC socket.

3. Remove the filter cover.
   - Turn over the projector. Pull down the carrying handle (①), grab the tab (②) and slide open the filter cover (③).

4. Remove the air filter.
   - Pick the air filter up with your fingers and lift it out of the filter cover.
5 Place a replacement air filter.
- Place the new air filter onto the filter cover.

6 Replace the filter cover.
- Slide the filter cover in the direction of the arrow to close it.

Note
- Ensure the filter cover is securely installed. The power will not turn on unless it is correctly installed.
Maintenance Indicators

- The warning lights on the projector indicate problems inside the projector.
- If a problem occurs, either the temperature indicator or the lamp indicator will illuminate red, and the projector will enter the standby mode. After the projector has entered the standby mode, follow the procedures given below.

![Maintenance Indicators Diagram](image)

**About the temperature warning indicator**

If the temperature inside the projector increases, due to blockage of the air vents, or the setting location, the “TEMP.” will illuminate in the lower left corner of the picture. If the temperature keeps on rising, the lamp will turn off and the temperature warning indicator will blink, the cooling fan will run for a further 90 seconds, and then the projector will enter the standby mode. After “TEMP.” appears, ensure you perform the measures described on page 59.

**About the lamp indicator**

- When the remaining lamp life becomes 5% or less, “Change The Lamp.” will be displayed on the screen. When the percentage becomes 0%, it will change to “Change The Lamp.” (red), the lamp will automatically turn off and then the projector will automatically enter the standby mode. At this time, the lamp indicator will illuminate in red.
- If you try to turn on the projector a fourth time without replacing the lamp, the projector will not turn on.
<table>
<thead>

<td>• The filter cover, lamp unit cover or lens housing cover is open.</td>
<td>• If the power indicator blinks even when the covers are securely installed, or if the cooling fan does not run normally, then contact your nearest Sharp Authorized Projector Dealer or Service Center (see page 66) for advice.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td>• Cooling fan breakdown</td>
<td></td>
</tr>
</tbody>
</table>

**Info**

- If the temperature warning indicator illuminates and the projector enters the standby mode, check whether any of the ventilation holes are blocked (see page 8) and then try turning the power back on. Wait until the projector has cooled down completely before plugging in the power cord and turning the power back on. (At least 10 minutes.)
- If the power is turned off for a brief moment due to power outage or some other cause while using the projector, and the power supply recovers immediately after that, the lamp indicator will illuminate in red and the lamp may not be lit. In this case, unplug the power cord from the AC outlet, replace the power cord in the AC outlet and then turn the power on again.
- The cooling fan keeps the internal temperature of the projector constant and this function is controlled automatically. The sound of the cooling fan may change during operation because the fan speed may change and this is not a malfunction.
Regarding the Lamp

Lamp

- It is recommended that the lamp unit (optional: AN-C430LP) be replaced when the remaining lamp life becomes 5% or less, or when you notice a significant deterioration in the picture and color quality. The lamp life (percentage) can be checked with the on-screen display. See page 47.
- Purchase a replacement lamp unit of type AN-C430LP from your place of purchase, nearest Sharp Authorized Projector Dealer or Service Center.

IMPORTANT NOTE TO U.S. CUSTOMERS:
The lamp included with this projector is backed by a 90-day parts and labor limited warranty. All service of this projector under warranty, including lamp replacement, must be obtained through a Sharp Authorized Projector Dealer or Service Center. For the name of the nearest Sharp Authorized Projector Dealer or Service Center, please call toll-free: 1-888-GO-SHARP (1-888-467-4277).

Hg LAMP CONTAINS MERCURY For State Lamp Disposal Information www.lamprecycle.org or 1-800-BE-SHARP

Caution Concerning the Lamp

- This projector utilizes a pressurized mercury lamp. A loud sound may indicate lamp failure. Lamp failure can be attributed to numerous sources such as: excessive shock, improper cooling, surface scratches or deterioration of the lamp due to a lapse of usage time. The period of time up to failure largely varies depending on the individual lamp and/or the condition and the frequency of use. It is important to note that failure can often result in the bulb cracking.
- When the lamp replacement indicator and on-screen display icon are illuminated, it is recommended that the lamp be replaced with a new one immediately, even if the lamp appears to be operating normally.
- Should the lamp break, the glass particles may spread inside the lamp cage or gas contained in the lamp may be vented into the room from the exhaust vent. Because the gas in this lamp includes mercury, ventilate the room well if the lamp breaks and avoid all exposure to the released gas. In case of exposure to the gas, consult a doctor as soon as possible.
- Should the lamp break, there is also a possibility that glass particles may spread inside of the projector. In such a case, it is recommended you contact your nearest Sharp Authorized Projector Dealer or Service Center to assure safe operation.

Replacing the Lamp

Caution

- Do not remove the lamp unit from the projector right after use. The lamp will be very hot and may cause burn or injury.
- Wait at least one hour after the power cord is disconnected to allow the surface of the lamp unit to fully cool before removing the lamp unit.

Carefully change the lamp by following the instructions described in this section. *If you wish, you may have the lamp replaced at your nearest Sharp Authorized Projector Dealer or Service Center.

* If the new lamp does not illuminate after replacement, take your projector to the nearest Sharp Authorized Projector Dealer or Service Center for repair.
Removing and Installing the Lamp Unit

Warning!
• Do not remove the lamp unit from the projector right after use. The lamp and parts around the lamp will be very hot and may cause burn or injury.

Info
• Do not touch the glass surface of the lamp unit or the inside of the projector.
• To avoid injury to yourself and damage to the lamp, make sure you carefully follow the steps below.
• Do not loosen other screws except for the lamp unit cover and lamp unit.

1. Press STANDBY/ON on the projector or STANDBY on the remote control to put the projector into standby mode.
   • Wait until the cooling fan stops.

2. Disconnect the power cord.
   • Unplug the power cord from the AC socket.
   • Leave the lamp until it has fully cooled down (about 1 hour).

3. Remove the lamp unit cover.
   • Loosen the user service screw (①) that secures the lamp unit cover. Slide down (②) and remove the lamp unit cover (③).

4. Remove the lamp unit.
   • Loosen the securing screws from the lamp unit. Hold the lamp unit and pull it in the direction of the arrow. At this time, keep the lamp unit horizontal and do not tilt it.
5 Insert the new lamp unit.
• Press the lamp unit firmly into the lamp unit compartment. Fasten the securing screws.

6 Replace the lamp unit cover.
• Align the lamp unit cover and slide it to close. Then tighten the user service screw to secure the lamp unit cover.

Info
• If the lamp unit and lamp unit cover are not correctly installed, the power will not turn on, even if the power cord is connected to the projector.

Resetting the Lamp Timer
Reset the lamp timer after replacing the lamp.

Info
• Make sure to reset the lamp timer only when replacing the lamp. If you reset the lamp timer and continue to use the same lamp, this may cause the lamp to become damaged or explode.
• You can also reset the lamp timer via the LAN. (Refer to the SETUP MANUAL on the supplied CD-ROM for details.)

1 Connect the power cord.
• Plug the power cord into the AC socket of the projector.

2 Reset the lamp timer.
• While simultaneously holding down \( \downarrow \), \( \text{ENTER} \) and \( \text{MENU} \) on the projector, press \( \text{STANDBY/ON} \) on the projector.
• “LAMP 0000H” is displayed, indicating that the lamp timer is reset.
Computer Compatibility Chart

The table below lists signal codes that are compatible with the projector. When the images are distorted or cannot be projected, adjust the output signal of your computer and so forth while referring to the table below.

**Computer**
- Multiple signal support
- Pixel Clock: 12–108 MHz
- Sync signal: Compatible with TTL level
- Compatible with sync on green signal

The following is a list of modes that conform to VESA. However, this projector supports other signals that are not VESA standards.

<table>
<thead>
<tr>

**Note**
- This projector may not be able to display images from notebook computers in simultaneous (CRT/LCD) mode. Should this occur, turn off the LCD display on the notebook computer and output the display data in “CRT only” mode. Details on how to change display modes can be found in your notebook computer’s operation manual.
- When this projector receives 640 x 350 VESA format VGA signals, “640 x 400” appears on the screen.
- When projecting the RGB interface signal using COMPUTER/COMPONENT 1, 2 or DVI-D with “Signal Type” set to “Auto” or “RGB”, the image may not be projected as desired. In this case, use either Video or S-Video.
