

SHARP

FO-B1600

Plain Paper Inkjet Facsimile

**A Versatile Performer for Your
Expanding Business**

With versatile features and a compact, ergonomic design, the new Sharp FO-B1600 Desktop Facsimile delivers advanced performance for your business.

Large Paper Capacity

The FO-B1600 facsimile's adjustable 200-sheet paper capacity is adequate for even the busiest offices. With the efficient 20-sheet automatic document feeder, you can simply insert your documents, dial, and walk away—reducing the time spent at the fax. Plain paper convenience allows you to easily mark, file, or re-fax documents without having to copy them first. And with its small footprint, the FO-B1600 is compact—so it fits almost anywhere.

Efficiency that Really Adds Up

The Sharp FO-B1600 facsimile delivers added productivity with a myriad of time-saving features. Equipped with 18 rapid dials, 81 speed dials, and a phonebook search feature, you'll never have to manually dial a fax number. The 14.4 Kbps modem transmits faxes at an efficient 6 seconds per page. Plus, the FO-B1600 delivers advanced features including serial broadcasting, group dialling, and automatic redial—all designed to save time and increase your productivity.

Increased Memory Capacity

With 1.8 MB of memory, the Sharp FO-B1600 can store approximately 100 pages. You'll never miss an important fax—even if the paper supply runs out.

Exceptional Image Quality

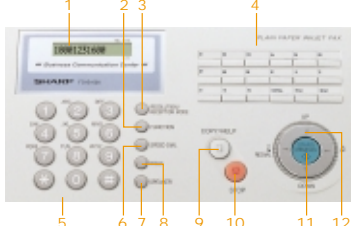

With superfine resolution, 64-level halftone control, and automatic contrast control, the FO-B1600 transmits documents with crisp detail—so legibility is never an issue. And with a print resolution of 600 dpi, incoming faxes look almost as good as the original!

Added Functionality

The FO-B1600 facsimile delivers several innovative features designed for today's busy office. The Zoom Copy Mode with 7 presets allows you to copy documents from 70%–200%. Management Reports help you maintain accurate fax records. The Anti-Junk Fax enables you to block out unsolicited mail. Additional features include Caller ID for simple plug and play operation.**
