

ISDN-compatible Videophone

TP-D100C

Compact Videophone with the Extraction of Face Region Feature

- Even facial expressions are clearly visible with the extraction of face region feature.
- Transmission of super-fine still pictures of TV image quality possible.
- Handy compact lid-type LCD monitor design.
- Different signal tones enable incoming voice-only and visual image transmission calls to be distinguished.
- Equipped with an "auto answer" mode so that it is the ideal videophone for stay-at-home nursing care.
- ITU-T H.320 international standard compliant; so it is possible to communicate with ISDN video phone based on ITU-T H.320. Integrated terminals for image and voice input/output.
